Asserting Native Resilience Pacific Rim Indigenous Nations Face The Climate Crisis:

Asserting Native Resilience Zoltán Grossman, Alan Parker, 2012 Indigenous nations are on the front line of the climate crisis. With cultures and economies among the most vulnerable to climate-related catastrophes, Native peoples are developing twenty-first century responses to climate change that serve as a model for Natives and non-Native communities alike. Native American tribes in the Pacific Northwest and Indigenous peoples around the Pacific Rim have already been deeply affected by droughts, flooding, reduced glaciers and snowmelts, seasonal shifts in winds and storms, and the northward movement of species on the land and in the ocean. Using tools of resilience, Native peoples are creating defenses to strengthen their communities, mitigate losses, and adapt where possible. *Asserting Native Resilience* presents a rich variety of perspectives on Indigenous responses to the climate crisis, reflecting the voices of more than twenty contributors, including tribal leaders, scientists, scholars, and activists from the Pacific Northwest, British Columbia, Alaska, and Aotearoa New Zealand and beyond. Also included is a resource directory of Indigenous governments, NGOs, and communities, and a community organizing booklet for use by Northwest tribes.

Religion and Culture in Native America Suzanne Crawford O'Brien, 2020-03-10 *Religion and Culture in Native America* presents an introduction to a diverse array of Indigenous religious and cultural practices in North America, focusing on those issues in which tribal communities themselves are currently invested. These topics include climate change, water rights, the protection of sacred places, the reclaiming of Indigenous foods, health and wellness, social justice, and the safety of Indigenous women and girls. Locating such contemporary challenges within their historical religious and cultural contexts illuminates how Native communities' responses to such issues are not simply political but deeply spiritual, informed by sacred traditions, ethical principles, and profound truths. In collaboration with renowned ethnographer and scholar of Native American religious traditions, Inés Talamantez, Suzanne Crawford O'Brien abandons classical categories typically found in religious studies textbooks and challenges essentialist notions of Native American cultures to explore the complexities of Native North American life. Key features of this text include: Consideration of Indigenous religious traditions within their historical, political, and cultural contexts; Thematic organization emphasizing the concerns and commitments of contemporary tribal communities; Maps and images that help to locate tribal communities and illustrate key themes; Recommendations for further reading and research. Written in an engaging narrative style, this book makes an ideal text for undergraduate courses in Native American Religions, Religion and Ecology, Indigenous Religions, and World Religions.

Global Warming and the Climate Crisis Bruce E. Johansen, 2023-01-01 This textbook introduces readers to basic scientific principles of climate change. Based on extensive empirical evidence, it explains weather events that indicate climate change's evolution and presents important topics connected to climate change, such as political controversies, climate policy, as well as Native American perspectives. Finally, it presents attempted solutions, including policy recommendations and technological proposals for necessary changes in our world.
