Assessing for Learning Peggy L. Maki, 2023-07-03 While there is consensus that institutions need to represent their educational effectiveness through documentation of student learning the higher education community is divided between those who support national standardized tests to compare institutions educational

effectiveness and those who believe that valid assessment of student achievement is based on assessing the work that students produce along and at the end of their educational journeys This book espouses the latter philosophy what Peggy Maki sees as an integrated and authentic approach to providing evidence of student learning based on the work that students produce along the chronology of their learning She believes that assessment needs to be humanized as opposed to standardized to take into account the demographics of institutions as students do not all start at the same place in their learning Students also need the tools to assess their own progress In addition to updating and expanding the contents of her first edition to reflect changes in assessment practices and developments over the last seven years such as the development of technology enabled assessment methods and the national need for institutions to demonstrate that they are using results to improve student learning Maki focuses on ways to deepen program and institution level assessment within the context of collective inquiry about student learning Recognizing that assessment is not initially a linear start up process or even necessarily sequential and recognizing that institutions develop processes appropriate for their mission and culture this book does not take a prescriptive or formulaic approach to building this commitment What it does present is a framework with examples of processes and strategies to assist faculty staff administrators and campus leaders to develop a sustainable and shared core institutional process that deepens inquiry into what and how students learn to identify and improve patterns of weakness that inhibit learning This book is designed to assist colleges and universities build a sustainable commitment to assessing student learning at both the institution and program levels It provides the tools for collective inquiry among faculty staff administrators and students to develop evidence of students abilities to integrate apply and transfer learning as well as to construct their own meaning Each chapter also concludes with 1 an Additional Resources section that includes references to meta sites with further resources so users can pursue particular issues in greater depth and detail and 2 worksheets guides and exercises designed to build collaborative ownership of assessment The second edition now covers Strategies to connect students to an institution s or a program s assessment commitment Description of the components of a comprehensive institutional commitment that engages the institution educators and students all as learners Expanded coverage of direct and indirect assessment methods including technology enabled methods that engage students in the process New case studies and campus examples covering undergraduate graduate education and the co curriculum New chapter with case studies that presents a framework for a backward designed problem based assessment process anchored in answering open ended research or study questions that lead to improving pedagogy and educational practices Integration of developments across professional scholarly and accrediting bodies and disciplinary organizations Descriptions and illustrations of assessment management systems Additional examples exercises guides and worksheets that align with new content
