

Wound Assessment Tool

MEASURE – A guideline for wound assessment.

M	Measurement of the wound	Provides baseline data even if the incision line is well approximated. Measure the length of the incision and width of the approximated edge. Length is always the longest dimension, width is determined at the widest point 90° from length and if the wound is open, depth is the deepest part to the edge of the skin. <i>Always chart. Length x width x depth in cm.</i>
E	Exudate quality and amount Describe volume as a percentage of saturation on the dressing. (this makes it measurable.)	Colour, amount, consistency and odour (if present). Drainage from surgical wound should diminish within three to four days. Signs of increasing bio burden may include increased serous exudate; purulent drainage; colour change from clear serous to opaque yellow; odour.
A	Appearance of wound bed Again, describe in terms of percentage of visible tissue. (E.g. 70% granular and 30% slough.)	Tissue in the wound bed: quality, type and amount; epithelial tissue; granulation tissue; and presence of slough or necrotic tissue. Make note if tendon, muscle, or bone is visible.
S	Suffering	Complete a pain assessment; note type, quality and degree of pain. Use a pain assessment tool (PQRSTU). Offer analgesic prior to dressing change.
U	Undermining	Identify whether there is tunneling or Undermining, and measure the amount. Describe the location of the undermining as you would a clock. (E.g. 4 cm tunnel at 4 o'clock) (The patient's head is 12 o'clock)
R	Re-evaluate	Too-frequent assessment may lead to inappropriate changes in the treatment plan, while infrequent assessment may miss significant deterioration. Always recheck your dressing after applying. It may be as simple as it was not secured and is falling off, or if there is any breakthrough on the cover dressing. With optimum wound healing You can expect 30% reduction in size in 3 weeks.
E	Exudate	Edge of the wound • Asses the edge (gaps in the suture line). If dehiscence occurs. Description of the peri-wound tissues should include colour, temperature and presence/location of edema or induration. Induration along both sides of the suture line may be expected, and may be a healing ridge.

This is an open abdominal post-surgical wound. Measuring 18 cm x 4.0 cm x 4.5 cm deep. Wound bed is 98% clean and pale pink, no visible granulation tissue present. Muscle is visible in the deepest part of wound.

Remember these best practice principles...

- Fluff don't stuff the wound
- Use one piece of packing where possible
- Don't forget the "whole person, not the hole in the person"
- Optimize nutrition
- If the factors that contributed to the wound are not resolved , healing will not take place.

Simpson, Nancy Giunta, 2014-01-28 The collective, inclusive, and intersectional framework used in this book speaks to the significance of understanding aging across diverse cultures from multiple perspectives but still as a shared human experience. The underlying message of the book is that although we are unique and different in our aging processes, we are ultimately connected through this physical, mental, and spiritual experience of aging. Thus, regardless of whether we are service providers, service recipients, educators, or merely fellow human beings, it is important that we approach the aging experience through a collective lens for discovering and sharing resources as we age, honoring the past while simultaneously accepting that the future is here. A few select examples of key findings from this collaborative work are as follows: First, despite progress in the field, certain issues remain to be addressed, including the challenges of racism and sexism, mistreatment, the digital divide, poverty, and other social and economic crises in urban and rural communities as they relate to our aging population. Second, the need for sustaining a sense of independence among the aged and interdependence among supportive systems is warranted. Third, our elders continue to benefit from culturally competent services, community-based health interventions, and social services that address normative and emerging
