Beyond Colonialism Development Globalisation Perspectives:

Beyond Colonialism, Development and Globalization Dominique Caouette, Dip Kapoor, 2015-12-15 Development studies is in a state of flux A new generation of scholars has come to reject what was once regarded as accepted wisdom and increasingly regard development and globalization as part of a continuum with colonialism premised on the same reductionist assumption that progress and growth are objective facts that can be fostered measured assessed and controlled Drawing on a variety of theoretical perspectives and approaches this book explores the ways in which social movements in the Global South are rejecting Western centric notions of development and modernization as well as creating their own alternatives By assessing development theories from the perspective of subaltern groups and movements the contributors posit a new notion of development from below one in which these movements provide new ways of imagining social transformation and a way out of the developmental dead end that has so far characterized post development approaches Beyond Colonialism Development and Globalization therefore represents a radical break with the prevailing narrative of modernization and points to a bold new direction for development studies

Natural Resource Sovereignty and the Right to Development in Africa Carol Chi Ngang, Serges Djoyou Kamga, 2021-08-25 This book explores the nexus between natural resources ownership and the right to development in Africa The right to sovereignty over natural resources and the right to development are recognised and protected in an extensive framework of international regional and domestic instruments They guarantee people s entitlement to fully and freely utilise their natural resources as a means of subsistence and for economic social and cultural development Yet despite the abundance of natural resources in Africa a majority of the people on the continent remain largely impoverished This book articulates the central argument that to achieve the right to development in Africa requires appropriate governance of the

continent's natural resources to which the people of Africa are guaranteed sovereign ownership. With case study illustrations from Zimbabwe, Ghana, Ethiopia, and the Democratic Republic of Congo, chapters explore the normative measures, specific guarantees, and community entitlements to natural resources for the realisation of the right to development. The book will be an invaluable guide to scholars and postgraduate students of Natural Resources Development and African studies, as well as policymakers and practitioners in these areas.

Development and Social Change Philip McMichael, Heloise

Weber, 2024-12-09. *Development and Social Change* explores the historical, socio-political, and ecological aspects of development. The Eighth Edition critically engages with the concept of development, tracing its roots and examining its implications in the contemporary world. Authors Philip McMichael and Heloise Weber use case studies and examples to help describe a complex world in transition. Students are encouraged to see global development as a contested historical project. By showing how development stems from unequal power relationships between and among peoples and states, often with planet-threatening environmental outcomes, it enables readers to reflect on the possibilities for more just social, ecological, and political relations.

Global Rights? Nehal Bhuta, Rodrigo Vallejo, 2024-10-20. What is the place of human rights law within global governance? How can we safeguard human rights in various sites of global governance? What is the role of the state, non-state actors, and global governance institutions in all this? *Global Rights: Human Rights in Complex Governance* interrogates how human rights and global governance interact with various sub-fields of international and transnational regulation to answer these foundational questions. The volume offers a detailed exploration of the role of human rights in global governance contexts such as the sovereign debt regime, global value chains, development assistance, international food governance, and the laws of war. Through an in-depth study of several global governance regimes based on diverse theoretical and methodological approaches, this volume challenges the mainstream discourse on the evolution of human rights law and its limits. As a result, issue areas that are rarely in conversation with each other, such as the World Bank's practices and the law on the use of force, are examined through a common analytical framework that is both rich and flexible enough to shed new light on individual areas of concern and simultaneously reflect on cross-cutting themes. Bringing human rights experts together with leading scholars in the law of international organizations, public finance, corporations, and use of force, *Global Rights* thus serves as a contemporary reflection and set of arguments on how to study and productively think about human rights in complex governance settings.

Revolutions in Learning and Education from India Christoph

Neusiedl, 2021-02-15. This book offers an important critique of the ways in which mainstream education contributes to perpetuate an inherently unjust and exploitative development model. Instead, the book proposes a new anarchistic postdevelopmental framework that goes beyond development and schooling to ask what really makes a meaningful life. Challenging the notion of development as a win-win relationship between civil society, the state, and the private sector, the book argues that development perpetuates a hierarchical world order and that the education system serves to reinforce and

re legitimise this unequal order Drawing on real life examples of unschooling and self designed learning in India the book demonstrates that more autonomous approaches such as these can help to fundamentally challenge dominant ideas of education equality development and what it means to lead meaningful lives The interdisciplinary approach pursued in this book makes it perfect for anyone with interests across the areas of education development studies radical political theory and philosophy

Decolonizing Colonial Development Models in Africa Fidelis Allen, Luke A. Amadi, 2022-01-17 Decolonizing Colonial Development Models in Africa A New Postcolonial Critique confronts colonial development models to decolonize methodologies epistemologies and the history and practice of development in postcolonial African societies and advocates for Afrocentric alternatives By taking a critical approach and drawing on postcolonial postmodern post developmental and post structural theories the contributors identify and analyze the effects of global inequality racism white supremacy crisis climate change increasing environmental insecurity underdevelopment chronic diseases and the vulnerability of the postcolonial societies of the global South Together the collection calls for and theorizes a new direction of development that incorporates indigenous Afrocentric alternatives

Decentring Global Challenges in International Relations Debora Valentina Malito, Evangelos Fanoulis, 2025-08-21 This book examines contemporary global challenges from a decentring perspective advancing an interdisciplinary conversation International studies scholarship has become increasingly more interdisciplinary and multifocal especially as the escalation of systemic ecological and economic crises as well as social and political challenges in the 21st century have required comprehensive ways of thinking and taking stock of existing ontological and epistemic limitations A decentring approach is crucial to account for how interdependent relations across states and societies regions and the globe shape modernity and its global manifestations are in an era of growing and persistent crises The book explains why traditional hegemonic approaches to global challenges are problematic and conceptualises what a decentring approach to global challenges entails a deconstruction of traditional and sedimented epistemic underpinnings implying a rethinking of agency time geographies norms topics and loci of public attention but also an appreciation of the mutually constructed nature of the international This book will appeal to students and scholars of international relations IR and international studies who are interested in decentring as well as those working for civil society organisations CSOs NGOs and think tanks

Social Movements Contesting Natural Resource Development John F. Devlin, 2019-10-22 Presenting a broad range of case studies this book explores rural social movements contesting natural resource development initiatives Natural resource development takes multiple forms including infrastructure corridors mines dams resource processing plants and pipelines Many of which are driven by economic valuations whilst social and environmental effects are given limited consideration In this volume the authors discuss the emergence process and outcomes of social movements with respect to these natural resource development projects including examples of confrontation seeking to either block developments or promote alternative development approaches such as agritourism The examples taken from Africa Asia North America

Europe and Latin America demonstrate the diversity of struggles stimulated by natural resource development including both immediate and longer term effects repertoires of action political and cultural work Taken together the case studies provide a rich overview of current movements engaged in resisting the neoliberal agenda of global resource exploitation This book will be key reading for scholars interested in social movements natural resource development environmental policy and development studies It will also be of interest to activists engaged in mobilizations stimulated by natural resource development projects
