Amateur Radio ,1989 Popular Science ,1979-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Guerrilla Television** Michael Shamberg, Raindance Corporation, 1971 This book presents ways to break the stranglehold of broadcast television on the American mind by using low cost portable video tape cameras video cassettes and cable television to design alternative television networks that favor portability and decentralization The author's contention is that politics are obsolete and that information tools and tactics are a more powerful means of social change To achieve true democracy the author suggests that we develop a sense of media ecology in what he calls media America or the information environment This is the first manual or how to book for new media tools **Journal of the SMPTE.** Society of Motion Picture and Television Engineers, 1975-07 *Personnel Qualification Standard for Radio Communications (common).* ,1984 *Ham Radio* ,1981
