

# REVIEW OF MARY MIDGLEY'S ANIMALS AND WHY THEY MATTER

DONALD VANDEVEER  
North Carolina State University

I have never met Mary Midgley, but reading her *Animals and Why They Matter* makes me think she is, indeed, a sly person. After all, innocent purchasers of her book expect to read about our treatment of animals, but Midgley sneaks in, for a start, essays about our treatment of slaves, women, the concept of equality, the power of symbolism, the concept of emotion, and the demonstrable myopia of most of the so-called great thinkers of the Western tradition. She does all this with verve, considerable learning, and with refreshing turns of phrase; for example, on Hobbes' identification of injustice as the non-performance of contract, she notes that "it is impossible to extract from this tiny hat that large rabbit, morality." She also exhibits a nice, down-to-earth sensitivity to facts. In discussing R. G. Frey's "no desires without beliefs and no beliefs without language" thesis, and against the doubt that a dog could desire or choose to perform a certain act every Friday, Midgley calls attention to the notable case of one guide-dog who spontaneously took her owner shopping each Friday without being told. Against the skeptics and perverse behaviorists (if that is not a redundant phrase) who deny that animals have moods, feelings, or "inner mental processes," she reminds us of the mahouts (elephant handlers) who would likely be killed if they could not ascertain that an elephant was angry. In brief, then, one might complain that this book is not what one bargained for. Happily, however, and unlike a familiar result, one gets more rather than less. Indeed, it is rare that a philosophy book is brief, incisive, far-ranging, clear, and cogently argued. Some books ought to be read but doing so is a chore. *Animals and Why They Matter* is both instructive and satisfying.

Typically, after a few generous remarks, reviewers go on to identify real or alleged flaws and, shortly, I shall try to articulate a few reservations. First, a bit of descrip-

tion of the book's focus is in order. Much of the book is devoted to identifying those doctrines, quasi-articulated reasons, attitudes, and psychological shards which tend to block us from thinking clearly about (non-human) animals and about our moral relationship with them. That these obstacles are very great is born out by the enormous neglect of such matters by most of the thinkers that we label "the greats." It is also born out by name-calling, disdain, and cheap shots that emanate from people who, on certain topics, are among the best and brightest—from ordinary people down to scientists and philosophers. Although a good deal of work has occurred—analyzing the arguments concerning duties toward, or rights of, animals—in the last decade or so, we still hear the same shoddy claims or arguments from those who do not question the status quo, e.g., we lack contractual relations with animals, they don't talk (as we do), they are not moral agents, not experimenting on them would impede science, maybe they lack feelings, after all they're not human, and so on. As if such considerations are all true, or if true, as if they clearly settled the disputes. Midgley, with understanding, fairness, and care dismantles a good number of these views, in particular those which appeal to natural competition, to the claim that those who believe in duties to animals are too emotional, to rationalist considerations (which tend to deny that justice is owed to the non-rational or those not self-conscious, e.g., Hume, Kant, and Rawls). In a later chapter (?), Midgley tellingly illustrates how some of "the greats" (e.g., Hume, Kant, and Rousseau) tend to lose, or not employ, their
