the sociology of education *The Qualified Student* Harold S. Wechsler, 2017-09-29 In *The Qualified Student* Harold S. Wechsler focuses on methods of student selection used by institutions of higher education in the United States. More specifically, he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds. Implicit in much of this book is an underlying social and ethical question: How legitimate was and is higher education's regulation of social mobility? Public concern over colleges and universities' practices became inevitable once they became regulators between social classes. The challenging of colleges' admissions policies in the courts augments similar concerns that have been present in legislatures for decades. The volume is divided into three main sections: Prerequisites, Columbia and the Selective Function, and Implications. It focuses mainly on four universities: The University of Michigan, Columbia University, the University of Chicago, and the City University of New York. Wechsler maintains that, unlike other universities, these institutions were pacesetters; they did not adopt a new policy simply because some other college had already adopted it. A new introduction brings the book, originally published in 1977, up to date and demonstrates its continuing importance in today's academic world of selective admissions.

Developing and Delivering Adult Degree Programs James P. Pappas, Jerry Jerman, 2014-02-25 This issue explores the growing field of adult degree programs and considers the theoretical underpinnings of such programs and hands on issues as curriculum, faculty, marketing, technology, financing, and accreditation, all with a goal of informing and equipping both scholars and practitioners. More and more adults who have been out of school for many years have turned to colleges and universities to complete undergraduate and graduate degrees that will make them competitive in the workforce, fulfill a professional requirement, or enrich them intellectually. Higher education institutions and many private organizations have responded to this demand by creating innovative degree programs aimed specifically at mature learners: students who want to self-design their educational programs and do not hesitate to change institutions if they believe their needs are not being met. This explosive growth in adult degree programs is largely the result of distance education technologies and the Internet. Other significant factors include the potential such programs have for providing additional revenue streams for institutions, the fierce competition from the private sector, and other higher education institutions, and the rising interest in interdisciplinary programs. This is the 103rd volume of the Jossey-Bass quarterly report series *New Directions for Adult and Continuing Education*.
