A Systematic Theory Of Argumentation The Pragma Dialectical Approach:

A Systematic Theory of Argumentation Frans H. van Eemeren, Robert Grootendorst, 2004 In this book two of the leading figures in argumentation theory present a view of argumentation as a means of resolving differences of opinion by testing the acceptability of the disputed positions Their model of a critical discussion serves as a theoretical tool for analyzing evaluating and producing argumentative discourse This is a major contribution to the study of argumentation and will be of particular value to professionals and graduate students in speech communication informal logic rhetoric critical thinking linguistics and philosophy

A Systematic Theory of Argumentation Frans Hendrik Eemeren, Robert Grootendorst, 2004 **A Systematic Theory of Argumentation** R. Grootendorst, 2004 In this book two of the leading figures in argumentation theory present a view of argumentation as a means of resolving differences of opinion by testing the acceptability of the disputed positions This is a major contribution to the study of argumentation

Argumentation Theory: A Pragma-Dialectical Perspective Frans H. van Eemeren, 2018-07-27 The book offers a compact but comprehensive introductory overview of the crucial components of argumentation theory In presenting this overview argumentation is consistently approached from a pragma dialectical perspective by viewing it pragmatically as a goal directed communicative activity and dialectically as part of a regulated critical exchange aimed at resolving a difference of opinion As a result the book also systematically explains how the constitutive parts of the pragma dialectical theory of argumentation which are discussed in a number of separate publications hang together The following crucial topics are discussed 1 argumentation theory as a discipline 2 the meta theoretical principles of pragma dialectics 3 the model of a critical discussion aimed at resolving a difference of opinion 4 fallacies as violations of a code of conduct for reasonable argumentative discourse 5 descriptive research of argumentative reality 6 analysis as theoretically motivated reconstruction 7 strategic manoeuvring aimed at combining achieving effectiveness with maintaining reasonableness 8 the conventionalization of argumentative practices 9 prototypical argumentative patterns 10 pragma dialectics amidst other approaches Argumentation Theory A Pragma Dialectical Perspective is clearly written and makes argumentation theory understandable to all scholars and advanced students interested in argumentation research

Introduction to a Negative Approach to Argumentation Julio Cabrera, 2019-10-25 This work deals with argumentation in philosophy In the affirmative view of argumentation each party thinks it is right while all other positions are wrong argumentation is seen as guided by a set of rules that should lead to the resolution of the dispute in favor of one party This book advances a critique of such an approach proposing instead a negative one the central idea of which is that each party organizes the elements of the problem concerning the definition of terms the assumptions to be accepted and the types of logical resources being used The negative approach attempts to modify the ethics of philosophical discussions moving towards pluralism a diversity of perspectives and the capacity to adopt a panoramic view where one's own posture appears only as one among others Argumentation is a ubiquitous matter

professionals of all areas will have to argue to support their positions in diplomacy medicine or religion and in everyday life In any of these contexts the distinction between an affirmative and a negative approach to argumentation matters The book will particularly appeal to graduate and postgraduate students in philosophy psychology pedagogy and communication as well as the general reader interested in philosophy

Groundwork in the Theory of Argumentation J. Anthony Blair, 2011-10-20 J Anthony Blair is a prominent international figure in argumentation studies He is among the originators of informal logic an author of textbooks on the informal logic approach to argument analysis and evaluation and on critical thinking and a founder and editor of the journal Informal Logic Blair is widely recognized among the leaders in the field for contributing formative ideas to the argumentation literature of the last few decades This selection of key works provides insights into the history of the field of argumentation theory and various related disciplines It illuminates the central debates and presents core ideas in four main areas Critical Thinking Informal Logic Argument Theory and Logic Dialectic and Rhetoric

The SAGE Handbook of Rhetorical Studies Andrea A. Lunsford, Kirt H. Wilson, Rosa A. Eberly, 2008-10-29 The SAGE Handbook of Rhetorical Studies surveys the latest advances in rhetorical scholarship synthesizing theories and practices across major areas of study in the field and pointing the way for future studies Edited by Andrea A Lunsford and Associate Editors Kirt H Wilson and Rosa A Eberly the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field

The Argument of Mathematics Andrew Aberdein, Ian J Dove, 2013-07-01 Written by experts in the field this volume presents a comprehensive investigation into the relationship between argumentation theory and the philosophy of mathematical practice

Argumentation theory studies reasoning and argument and especially those aspects not addressed or not addressed well by formal deduction The philosophy of mathematical practice diverges from mainstream philosophy of mathematics in the emphasis it places on what the majority of working mathematicians actually do rather than on mathematical foundations The book begins by first challenging the assumption that there is no role for informal logic in mathematics Next it details the usefulness of argumentation theory in the understanding of mathematical practice offering an impressively diverse set of examples covering the history of mathematics mathematics education and perhaps surprisingly formal proof verification From there the book demonstrates that mathematics also offers a valuable testbed for argumentation theory Coverage concludes by defending attention to mathematical argumentation as the basis for new perspectives on the philosophy of mathematics

Argumentation in Political Deliberation Marcin Lewiński, Dima Mohammed, 2015-07-15 The goal of this volume is to further the examination of the role shape and quality of argumentation in political deliberation The chapters collected in the volume employ the concepts and methods developed within argumentation theory to investigate the specifics of political discourse across various deliberative arenas from debates in the European Parliament consensus conferences and public hearings in France discussions in Dutch online forums to exchanges of comments in online versions of British

newspapers In this way the studies reveal the inner workings of argumentative interactions that constitute deliberative discourse and thus importantly contribute to the study of public deliberation This should be of interest to the students of argumentation deliberation and political discourse In addition the volume problematizes and theorizes some vital issues related to the study of situated argumentation thus advancing the study of argumentation in context Originally published in Journal of Argumentation in Context Vol 2 1 2013

The Philosophy of Argument and Audience Reception Christopher W. Tindale, 2015-04-30 Recent work in argumentation theory has emphasized the nature of arguers and arguments along with various theoretical perspectives Less attention has been given to the third feature of any argumentative situation the audience This book fills that gap by studying audience reception to argumentation and the problems that come to light as a result of this shift in focus Christopher W Tindale advances the tacit theories of several earlier thinkers by addressing the central problems connected with audience considerations in argumentation problems that earlier philosophical theories overlook or inadequately accommodate The main tools employed in exploring the central issues are drawn from contemporary philosophical research on meaning testimony emotion and agency These are then combined with some of the major insights of recent rhetorical work in argumentation to advance our understanding of audiences and suggest avenues for further research
