A Textbook of Botany for Colleges William Francis Ganong, 1920 *A Textbook of Botany for Colleges* William Francis Ganong, 2015-06-02 Excerpt from *A Textbook of Botany for Colleges* This book is written in recognition of the fact that to nearly all college students an introductory course in Botany is part of a general education and not a preparation for a professional botanical career The distinction is important because our existent courses are largely adapted even though unconsciously on our part to the latter end The needs in the two cases are not the same though the difference is less in matter and method than in proportion and emphasis All students alike need that personal contact with specific realities and that exercise in verifiable reasoning which laboratory courses render possible Knowledge however is valuable to the specialist in the proportion to its objective importance but to the general student in the accordance with its bearing on the actions and thoughts of mankind In the one case the demands of the science are paramount and in the other the interests of the student This aim to provide for the general rather than the special student will explain certain characteristics of the book notably its emphasis upon the larger and more evident phenomena its attention to the interpretation or principle of things and its full consideration of man's relation to plants Indeed the book may be described as an attempt to present and interpret the humanly important aspects of plant nature in the light of our modern scientific knowledge For the same reason the book is deliberately conservative and adopts only such statements and views as have passed the test of wide criticism and attained to the impersonal and non institutional validity of science About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *A textbook of botany for colleges* William Francis Ganong, 1920 *A Textbook of Botany for Colleges and Universities: Morphology and physiology* John Merle Coulter, Charles Reid Barnes, Henry Chandler Cowles, 1910 *A Textbook of Botany for Colleges* William F.
