Standards-Based Classroom Emily Rinkema, Stan Williams, 2018-08-10 Win big in the standards based classroom Standards Based Learning SBL is NOT standardization In fact when we recognize the central purpose of SBL which is to make learning

the goal for all students we can design systems and structures that are more personal more flexible and more engaging for us and for our students At its core SBL simply asks us to organize our teaching and learning around three questions These questions guide the creation of targets the development of assessments the instructional planning and the systems to communicate learning Where do we want our learners to go How do we know where our learners are in relation to where we want them to go How do we move them from where they are towards or beyond where we want them to be While simple at the core the transition to a standards based classroom is anything but The complexity comes in the implementation the integration into existing systems and the difficult task of moving away from what s most comfortable The Standards Based Classroom provides practical strategies and steps based on many years of both failures and successes to support educators during this transition to a standards based system The accessible and concrete examples tools and templates in the book can be adapted into any classroom Teachers who are new to SBL will understand the parts experienced teachers will see the connections to current practices and all educators will realize the potential SBL has to transform learning

Charting a Course to Standards-Based Grading Tim Westerberg,2016-08-24 What s the best way to ensure that grading policies are fair accurate and consistent across classrooms How can schools transition to a grading system that better reflects what students are actually learning Tim R Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment Destination 1 critically examines such popular grading mechanisms as the zero extra credit the semester killer project averaging mixing academic performance with work ethic and refusing to accept late work and

explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students Destination 2 invites educators to put assessment and grading into the larger context of a districtwide guaranteed and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades Destination 4 competency based education involves a total rethinking of the nature and structure of school leading to individualized education for all students However far they choose to go administrators and teacher leaders can turn to Charting a Course to Standards Based Grading for the quick wins and long term support and guidance they need to make the trip well worth the effort
