Seventeenth Century Practical Mathematics Paul Hughes, 2021-09-28
This exciting Greenville Collins biography is about seventeenth century navigation focusing for the first time on mathematics practised at sea
This monograph argues the Restoration kings Charles II and James II promotion of cartography for both strategy and trade
It is aimed at the academic cartographic and larger market of marine enthusiasts
Through shipwreck and Arctic marooning and Dutch and Spanish charts Collins evolved a Prime Meridian running through Charles's capital
After John Ogilby's successful Britannia Charles set Collins surveying his kingdom's coasts and James set John Adair surveying in Scotland
They triangulated at sea
Subsequently Collins persuaded James to sustain his dead brother's ambition
This the British coast's first survey took six years
After James's flight and William III's invasion Collins led the royal yacht squadron for six years more garnering funds to publish Great Britain's Coasting Pilot
The Admiralty and civic institutions subsidised what became his own pilot
Collins aided Royal Society members in their investigations and his new guide remained vital to navigators through the century
Following Charles's cartographic promotion bloomed the most spectacularly in the atlases of Ogilby Collins and John Flamsteed for roads harbours and stars
