50 Fantastic Ideas Inspired by Famous Artists Judith Harries, 2019-07-11 _____ The 50 Fantastic Ideas series is packed full of fun original skills based activities for Early Years practitioners to use with children aged 0-5. Each activity features step by step guidance, a list of resources and a detailed explanation of the skills children will learn. Creative, simple and highly effective, this series is a must have for every Early Years setting. 50 Fantastic Ideas Inspired by Famous Artists uses well known art as a visual inspiration to develop expressive art and design skills in the Early Years. It is much easier now to access art online and to bring inspirational pieces into a setting without having to buy postcards or visit an art gallery. Drawing on these readily available online sources, Judith Harries presents 50 ideas featuring a range of diverse artists from Lubaina Himid and Friedensreich Hundertwasser to Mary Delany and Picasso and famous art including pop and street art, sculpture and portraiture. Using art supplies easily found in and outside the classroom such as paints, clay, pipe cleaners and natural resources like leaves and flowers, the interactive activities found in this book are ideal for inspiring creativity and fun at the same time.

The Little Book of Stories from Around the World Marianne Sargent, 2015-06-04 The stories featured in this book come from all over the world. The Practice Guidance for the Early Years Foundation Stage sets out the requirement that children be provided with positive images that challenge children's thinking and help them embrace differences in gender, ethnicity, language, religion, culture. Stories are a powerful medium that engage and envelop young children, helping them to enter unfamiliar worlds and begin to empathise with characters from different backgrounds. This book provides a range of stories through which young children can explore and learn about other cultures. Each activity page will include the story, adult led and independent activity ideas to follow up the story, related songs, poems and rhymes. A list of additional stories, information books and websites. Relevant links with the EYFS Areas of Learning and Development.

Animals into Art Howard Morphy, 2014-10-30 This book is one of a series of volumes resulting from the World Archaeological Congress, September 1986, which addressed world archaeology in its widest sense, investigating how people lived in the past and how and why changes took place to result in the forms of society and culture which exist now. The series brought together archaeologists and anthropologists from many parts of the world, academics from contingent disciplines and also non academics from a wide range of cultural backgrounds who could lend their own expertise to the discussions. This book is an exploration of the way in which the animal world features in the works of art of a variety of cultures of different times and places. Contributors have adopted a variety of perspectives for looking at the complex ways in which past and present humans have interrelated with beings they classify as animals. Some of the approaches are predominantly economic and ecological, some are symbolic and others philosophical or theological. All these different views are included in the interpretation of the artworks of the past, revealing some of the foci and inspirations of cultural attitudes to animals. Originally published 1989.

Human Ethology Irenaus Eibl-Eibesfeldt, 2017-07-28 With the discovery of conditioned reflexes by I P Pavlov the possibilities for experimenting following the example set by the classical exact sciences were made available to the behavioral sciences Many psychologists hoped that the component parts of behavior had also been found from which the entire multifaceted cosmos of behavior could then be constructed An experimentally oriented psychology subsequently developed including the influential school of behaviorism This first text on human ethology presents itself as a unified work even though not every area could be treated with equal depth For example a branch of ethology has developed in the past decade which places particular emphasis on ecology and population genetics This field known as sociobiology has enriched

discussion beyond the boundaries of behavioral biology through its stimulating and often provocative theses After vigorous debates between behaviorists anthropologists and sociologists we have entered a period of exchange of thoughts and a mutual approach which in many instances has led to cooperative projects of researchers from different disciplines This work offers a biological point of view for discussion and includes data from the author's cross cultural work and research from the staff of his institute It confirms above all else the astonishing unity of mankind and paints a basically positive picture of how we are moved by the same passions jealousies friendliness and active curiosity The need to understand ourselves has never been as great as it is today An ideologically torn humanity struggles for its survival Our species does not know how it should compensate its workers and it experiments with various economic systems constitutions and forms of government It struggles for freedom and stumbles into newer conflicts Population growth is apparently completely out of hand and at the same time many resources are being depleted We must consider our existence rati
