Access Scaffolding Chartered Institute Of Building:

Access Scaffolding Stewart Champion, 2014-07-22 Access scaffolding is the most important element of plant for building civil engineering and structural engineering contractors. In fact a building or structure cannot be constructed to a height of more than two metres without platforms to work from. These platforms have to be constructed on the site in the minimum of time but nevertheless backed up by accurate calculations and design details. Access Scaffolding brings together for the first time all the elements of scaffolding providing a comprehensive and unique guide to the best practice in scaffolding its engineering properties and the hazards involved. The book covers the very wide varieties of structure which have to be built and used in practice including suspended and completed structures. Diagrammatic details of the commonest types are featured. Access Scaffolding is a unique and indispensable handbook on the subject for contractor's field and design staff, safety inspectors of statutory bodies and structural civil and building consulting engineers. It is also a useful resource for students of structural and civil engineering and building degree courses.

Construction Technology For Tall Buildings (4th Edition) Yit Lin Michael Chew, 2012-06-04 This book introduces the latest construction practices and processes for tall buildings from foundation to roof. It attempts to acquaint readers with the methods, materials, equipment and systems used for the construction of tall buildings. The text progresses through the stages of site investigation, excavation and foundations, basement construction, structural systems for the superstructure, site and material handling, wall and floor construction, cladding and roof construction. The construction sequence, merits and limitations of the various proprietary systems commonly used in these respective stages are discussed. This fourth edition also includes several new topics not covered in the previous edition. The target readers are practitioners and students in the related professions including architecture, engineering, building, real estate, construction project and facilities management and quantity and land surveying.

Code of Estimating Practice The Chartered Institute of Building, 2012-11-05. This code of practice, long established as a leading publication for the construction industry, provides an authoritative guide to essential principles and good practice in estimating for building work. The seventh edition includes new material on estimating strategy, tendering procedures, and best practice, as well as the build up of unit rates of cost, overheads, and profit, and e-commerce.

New Code of Estimating Practice The Chartered Institute of Building, 2018-04-24. The essential authoritative guide to providing accurate, systematic, and reliable estimating for construction projects, newly revised. Pricing and bidding for construction work is at the heart of every construction business, and in the minds of construction consultants, poor bids lead to poor performance, and nobody wins. New Code of Estimating Practice examines the processes of estimating and pricing, providing best practice guidelines for those involved in procuring and pricing construction works, both in the public and private sectors. It embodies principles that are applicable to any project, regardless of size or complexity. This authoritative guide has been completely rewritten to include much more contextual and educational material, as well as the code of practice. It covers changes in estimating practice, the bidding process, the fundamentals in formulating a bid, the pre-qualification process, procurement options, contractual arrangements, and legal issues, preliminaries, temporary works, cost estimating techniques, risk management, logistics, resource, and production planning, computer-aided estimating, information, and time planning, resource planning, and pricing, preparation of an estimator's report, bid assembly, and adjudication, pre-production planning, and processes, and site production. Established standard for the construction industry, providing the only code of practice on construction estimating. Prepared under the auspices of the Chartered Institute of Building and endorsed by a range of other professional bodies. Completely rewritten since the 7th edition to include much more contextual and educational material, as well as the core code of practice. New Code of Estimating Practice is an important book for construction contractors, specialist contractors, quantity surveyors, cost consultants, and for students of construction and quantity surveying.
