

BOGEN®

COMMUNICATIONS, INC.

TELEPHONE PAGING AMPLIFIERS

TPU-35A, TPU-60A, TPU-100A

INSTALLATION INSTRUCTIONS

CAUTION

Connect only to PBX system incorporating isolation from telecom network.

ATTENTION

Raccordez seulement à un système PBX indépendant du réseau de télécommunications.

UNPACKING

The amplifier was carefully checked before leaving the factory; inspect the shipping container and unit closely for improper handling. If the unit has been damaged, make an immediate claim to the distributor from whom it was purchased. If the unit was shipped directly to you, save all packaging material, notify the carrier immediately and place a claim.

WARNING

The following installation instructions are for use by qualified service personnel only. To avoid an electric shock hazard, do not perform any functions requiring removal of the cover of the amplifier unless you are qualified to do so. To prevent fire or shock hazard, do not expose this unit to rain or moisture.

POWER AND GROUNDING

The AC line cord has a three-prong plug which should be plugged into a three-wire, grounded 120VAC, 60Hz outlet. It is important to ground the unit. If a three-wire outlet is not available, use an adaptor and connect the grounding prong to the screw securing the wall plate. If the wall plate screw is not grounded, connect a wire from the ground terminal of the amplifier to a suitable earth ground.

MOUNTING

The TPU-35A/60A/100A amplifiers are designed for surface wall mounting. When mounting the unit, consider the proximity to heat sources. Allow space for terminal wiring, access to controls, and adequate air flow for chassis heat dissipation. Where possible, secure the unit to wall studs or a suitable back brace. Use self-fastening or molly-type hardware on plasterboard and other thin materials.

Four #6x3/4" screws are provided with the unit. Locate the top two screws in position (13-1/2" apart) and secure them to the wall, allowing the screw heads to protrude 1/8" to 1/4". Fit the chassis over the screw heads and position the two bottom screws. Complete the mounting of the amplifier by tightening all screws securely.

INPUT CONNECTIONS

TELEPHONE PAGING

A balanced isolating transformer input for a telephone line is provided. A 600-ohm telephone line may be connected to the terminals marked T1P and RING. If two-conductor shielded wire is used, connect the shield to the adjacent ground terminal, which is to the left of the RING terminal.

LO-Z BALANCED MICROPHONE

A low-impedance balanced microphone can be connected to the two screw terminals (on the auxiliary barrier strip) marked MIC LO-Z BAL. Use two-conductor shielded wire and connect the shield to the adjacent GND terminal.
