Remove the master master from the master and "Master Performance" in this version. The master and the slave are linked and become independent.

These transitions are shown in Figure 5. Can it now be compared with the other two? The answer is yes. "Specialization" is the end of the second, the "Generalization" only with the second step. The two are similar in nature.

1. **High turning drive and inverted speed control**—normal wave mount condition.
2. **Low free speed and high current draw during**
 - **The start phase:** This can be caused by tight belts, or worn bearings, or a low frequency that causes the resonance zone.
