Readings in Russian Civilization Volume II Thomas Riha, 2009-02-15 This new and enlarged version of Readings in Russian Civilization is the result of fairly extensive revisions There are now 72 instead of 64 items 20 of the selections are new The first volume has undergone the least change with 3 new items of which 2 appear in English for the first time In the second volume there are 6 new items all of them appear in English for the first time The third volume has undergone the greatest revision with 11 new items of which 6 are newly translated from the Russian It is the editor's hope that items left out in the new edition will not be sorely missed and that the new selections will turn out to be useful and illuminating The aim throughout has been to cover areas of knowledge and periods which had been neglected in the first edition and to include topics which are important in the study of the Russian past and present The bibliographical headnotes have been enlarged with the result that there are now approximately twice as many entries as in the old edition New citations include not only works which have appeared since 1963 but also older books and articles which have come to the editor's attention From the Editor's Preface a judicious combination of seminal works and more recent commentaries that achieves the editor's purpose of stimulating curiosity and developing a point of view C Bickford O'Brien The Russian Review These three volumes cover quite well the main periods of Russian civilization The choice of the articles and other material is made by a competent and unbiased scholar Ivan A Lopatin Professor of Asian and Slavic Studies University of Southern California **A**

California **The Chautauquan** ,1890 *Photosynthesis Bibliography volume 1 1966/1970* Zdenek Sesták,J.

Catský,2012-12-06 It is generally accepted that photosynthesis whereby solar is transformed into geobiochemical energy is one of the most important processes in the bio sphere When we realize that the human population most of which is starving will double in 20 30 years and that photosynthesis is in practice the only source direct or indirect of food not only for men but for all living beings its importance becomes even plainer This fact was recognized from the outset of the International Biological Programme when photosynthesis was selected as one of the principal problems to be concentrated on The significance of the IBP in initiating a broader based approach and worldwide collaboration need not be emphasized here it is merely necessary to consider the rapid increase in the number of papers on photosynthesis since its inception It is of fundamental importance for scientists working on photosynthesis to get information on what has been done in recent years in this discipline Thus as complete as possible a bibliography is badly needed The complexity of this problem requires also that the progress of ecology chemistry and physics as far as they concern photosynthesis be followed Such a bibliography covering at least the last ten years will be indispensable for final synthesis of the results of the IBP photosynthetic programme

Resolutions and Decisions of the Communist Party of the Soviet Union Volume 1 RALPH CARTER ELWOOD,1974-12-15 This set of four volumes is an indispensable reference work for the study of modern Russia in general and Soviet Communism in particular Ever since its foundation on the eve of the twentieth century the organization now

called the Communist Party of the Soviet Union has been embodying its major policies in documents called resolutions and decisions. These form a much more continuous and extensive record of the evolution of Soviet Communism than the writings of any single leader and the standard Soviet anthology of these materials has gone through eight editions over a fifty year period. Yet most of this essential material has been available only in Russian and even in that language the standard editions have been marred by selectivity and editorial comment that is often politically motivated. At last students of modern Russian studies have access to a multi volume work that not only presents the most important Communist Party resolutions and decisions in English but also amplifies the standard Soviet anthology in important respects and provides editorial explanation that is independent of Kremlin politics. The rich store of materials in these four volumes ranges from the formation of the party to the fall of Khrushchev and it deals with a wide range of issues. The clearly organized volumes each contain a major introductory essay as well as shorter background essays on each party congress conference or Central Committee plenum. The documents approved by these meetings are often fundamental in importance but the centralist operation of the party in power has been such that many of the most vital decisions have been issued in the name of the Central Committee when there was no meeting of that body at all. It is one of the signal achievements of these volumes that the selection of materials included was based on a list of all known party decisions whether or not they have been included in the main Soviet reference work. The four volumes in this series are edited as an integral set. Each contains a subject index in which Russian abbreviations and acronymic names are translated. Tables summarizing the personnel of the main party executive bodies since 1917 are also provided. At the same time each of the volumes is built around a coherent period in the development of Russian Communism and each reflects the special features of its time. Volume 1 treats the period before the October Revolution of 1917. It is the first collection of materials on the early evolution of the Russian Social Democratic Party that deals with the entire movement so that the interaction of the various factions of the party may be understood as a whole and not merely in a partisan Leninist framework. This volume also breaks new ground in publishing in English vital records of Communist activity during the Revolution of 1917.
