Mastering Iron Anne Kelly Knowles, 2013-01-15 Veins of iron run deep in the history of America. Iron making began almost as soon as European settlement with the establishment of the first ironworks in colonial Massachusetts. Yet it was Great Britain that became the Atlantic world's dominant low cost high volume producer of iron, a position it retained throughout the nineteenth century. It was not until after the Civil War that American iron producers began to match the scale and efficiency of the British iron industry. In *Mastering Iron*, Anne Kelly Knowles argues that the prolonged development of the US iron industry was largely due to geographical problems the British did not face. Pairing exhaustive manuscript research with analysis of a detailed geospatial database that she built of the industry, Knowles reconstructs the American iron industry in unprecedented depth, from locating hundreds of iron companies in their social and environmental contexts to explaining workplace culture and social relations between workers and managers. She demonstrates how ironworks in Alabama Maryland Pennsylvania and Virginia struggled to replicate British technologies but in the attempt brought about changes in the American industry that set the stage for the subsequent age of steel. Richly illustrated with dozens of original maps and period art work, all in full color, *Mastering Iron* sheds new light on American ambitions and highlights the challenges a young nation faced as it grappled with its geographic conditions.

The Organization of Ancient Economies Kenneth Hirth, 2020-09-17 In this book, Kenneth Hirth provides a comparative view of the organization of ancient and premodern society and economy. Hirth establishes that humans adapted to their environments not as individuals but in the social groups where they lived and worked out the details of their livelihoods. He explores the variation in economic organization used by simple and complex societies to procure produce and distribute resources required by both individual households and the social and political institutions that they supported. Drawing on a wealth of archaeological historic and ethnographic information, he develops and applies an analytical framework for studying ancient societies that range from the hunting and

gathering groups of native North America to the large state societies of both the New and Old Worlds Hirth demonstrates that despite differences in transportation and communication technologies the economic organization of ancient and modern societies are not as different as we sometimes think
