

THERAPIST IMMEDIACY IN BRIEF PSYCHOTHERAPY: CASE STUDY I

LAURA B. KASPER, CLARA E. HILL, AND DENNIS M. KIVLIGHAN JR.

University of Maryland

The authors examined immediacy (i.e., discussions about the here-and-now therapeutic relationship) in a 12-session case of individual interpersonal psychotherapy. Therapist immediacy during immediacy events most often focused on parallels between external relationships and the therapy relationship, encouraging expression of immediate feelings, processing termination, therapist expressing disappointment/sadness/hurt and inquiring about the client's reactions. Client involvement was slightly higher before and after than during immediacy events. On the positive side, therapist immediacy seemed to help the client express her immediate feelings about the therapist more openly, feel closer to the therapist, and become less defended. On the

negative side, the client felt somewhat awkward and pressured when the therapist used immediacy. Limitations and implications for practice and research are discussed.

Keywords: immediacy, therapeutic relationship, psychotherapy process

Therapist immediacy, which we defined as disclosures within the therapy session of how the therapist is feeling about the client, him- or herself in relation to the client, or about the therapy relationship (Hill, 2004), involves discussing and processing what occurs in the here-and-now client–therapist relationship. Terms that other interpersonal theorists have used for this therapist intervention are metacommunication (Kiesler, 1988) and talking in the here-and-now about the here-and-now (Yalom, 1995, 2002). Interpersonal theorists (e.g., Cashdan, 1988; Kiesler, 1988, 1996; Safran & Muran, 2000; Teyber, 2006; Yalom, 1995, 2002) have suggested that clients reenact with their therapists the interpersonal conflicts that brought them into therapy. If therapists can use immediacy with clients to openly discuss these conflicts in the therapeutic relationship, clients can become aware of and change these interpersonal patterns. Thus, working immediately with the therapeutic relationship can help clients have a corrective emotional experience and change both internally and interpersonally.

Psychoanalytic therapists also work with the therapeutic relationship, particularly by interpreting and resolving the client (patient) transference. To describe the therapist (analyst) behavior, they use terms such as transference interpretation (Hoglund, Johnsson, Marble, Bogwald, & Amlo, 2007; Malan, 1976; Strupp & Binder, 1984), interpretation of the here-and-now transference (Gill, 1984), working in the moment (Greenson, 1967), and countertransference disclosures (i.e., a form of “clinical honesty that focuses on the

Wells,Vincent J. Giannetti,2013-11-22 The last two decades have seen unprecedented increases in health care costs and at the same time encouraging progress in psychotherapy research On the one hand accountability cost effectiveness and efficiency have now become commonplace terms for providers of mental health services whereas on the other hand an increasingly voluminous literature has emerged supporting the effectiveness of a number of types of psychotherapies There now exists the possibility for the design and delivery of mental health services that drawing upon this literature more closely approximate empirically established data concerning the appropriateness and effectiveness of psychotherapy The Handbook of the Brief Psychotherapies is intended to capture one major thrust of this movement the development of a group of empirically grounded time limited therapies all sharing a common interest in the clinical utilization of a structured focus and an emphasis on time and action For many years professional self interest competing theoretical paradigms and the vagaries of practice wisdom and clinical myth have influenced the practice of psychotherapy A critical questioning of the resulting predominantly nondirective open ended and global therapies has led to a growing emphasis on action oriented problem focused time limited therapies Yet ironically this interest in the brief psychotherapies has not so much involved a radical departure from traditional therapeutic modalities as it has emphasized a new pragmatism about how time action and structure operate in life as well as in therapy The Predictors of Successful Very Brief Psychotherapy Joseph E.
