A Study Of Interpersonal Relations:

A Study of Interpersonal Relations Patrick Mullahy, 1949 Donated by Sydney Harris **Conflict, Power, and Games** James T. Tedeschi, 2017-07-12 The technological revolution in the social sciences made available a set of research tools and data manipulation techniques that permit the study of complex social processes previously inaccessible or not amenable to our observational powers One important set of tools took the generic title experimental games which were characterized by the interactive protagonists pursuit of relatively well defined goals whose achievement is dependent on the behavior of others James T Tedeschi Barry R Schlenker and Thomas V Bonoma in this work explicate these highly structured interactions The grand strategy of scientific inquiry is the development of explanatory systems for natural phenomena The empirical tactics devised to manipulate control observe and measure events or processes of interest often require as much ingenuity and imagination as theory development itself Generally the situation is so structured that certain rules govern participant behavior Within these constraints the social psychological processes of conflict influence power bargaining and coalition formation can be studied Concerned with the more formal and technical aspects of games the authors explain how they are used for purposes of developing and testing scientific theory The emphasis throughout is on the development and empirical evaluation of a scientific theory of social influence and power in situations where the interests of the interacting parties are in conflict Experimental games have provided many of the concepts and the preponderance of evidence that have helped to unravel many of the complexities of social behavior In *Conflict Power and Games* the authors build a bridge between technical and non technical approaches in order to shed greater light on interpersonal relations **A study of interpersonal relations** Patrick Mullahy, 1949 Why Can't We All Just Get Along William N. Kalbfleisch, 2013-09-13 Interpersonal relationships are the core of our societal system and have been since before the dawn of civilization In today's world friends lovers companions and confidants make valuable contributions to our everyday lives These are the relationships whose members are not automatically participants as a result of their birth and kin affiliations The focus is on these relationships that must be forged from the sometimes indifferent and sometimes hostile world Yet there is still much that is not known about how these relationships evolve how partners communicate in on going relationships how people keep their relationships together and how they cope when they fall apart Primary to the focus of this book is the underlying theme of evolving interpersonal relationships from the initial encounter to the mature alliance The contributors to this volume provide a contemporary perspective for the study of interpersonal relationships Fresh areas of scholarly inquiry are presented and existing approaches are re examined Research in the introductory chapters breaks new ground and appraises the ultimate question of what impact initial interactions have on further relational development The mid section of the volume concerns communication issues that confront the members of a relationship in process focusing on how conflict and jealousy are communicated to a relational partner This research considers relational development as well as obstacles and barriers to evolving relationships The concluding chapters probe the question Ultimately do all good things have to come to an end Employing innovative techniques to examine maturing and disengaging relationships the research presented here focuses on how interpersonal relationships become committed and mature *The Dynamics of Bureaucracy : a Study of Interpersonal Relations in Two Government Agencies* Peter Michael Blau, 1963
