cognitive neuroscience psychopharmacology social psychology literature and genetics Drunk shows that our taste for chemical intoxicants is not an evolutionary mistake as we are so often told In fact intoxication helps solve a number of distinctively human challenges enhancing creativity alleviating stress building trust and pulling off the miracle of getting fiercely tribal primates to cooperate with strangers Our desire to get drunk along with the individual and social benefits provided by drunkenness played a crucial role in sparking the rise of the first large scale societies We would not have civilization without intoxication From marauding Vikings and bacchanalian orgies to sex starved fruit flies blind cave fish and problem solving crows Drunk is packed with fascinating case studies and engaging science as well as practical takeaways for individuals and communities The result is a captivating and long overdue investigation into humanity s oldest indulgence one that explains not only why we want to get drunk but also how it might actually be good for us to tie one on now and then
