Ernest Sosa, Oxford University Press

A Virtue Epistemology Apt Belief And Reflective Knowledge Volume I:

A Virtue Epistemology Ernest Sosa, 2007-06-28 A Virtue Epistemology presents a new approach to some of the oldest and most gripping problems of philosophy those of knowledge and scepticism Ernest Sosa argues for two levels of knowledge the animal and the reflective each viewed as a distinctive human accomplishment By adopting a kind of virtue epistemology in line with the tradition found in Aristotle Aquinas Reid and especially Descartes he presents an account of knowledge which can be used to shed light on different varieties of scepticism the nature and status of intuitions and epistemic normativity

A Virtue Epistemology Ernest Sosa, 2007 Reflective Knowledge Ernest Sosa, 2009-01-08 Reflective Knowledge draws together ground breaking work in epistemology by Ernest Sosa He argues for a reflective virtue epistemology based on virtuous circularity shows how this idea may be found explicitly or just below the surface in such illustrious predecessors as Descartes and Moore and defends the view against its rivals *A Virtue Epistemology* Ernest Sosa, Oxford University Press, 2007 This work presents a new approach to some of the oldest and most gripping problems of philosophy those of knowledge and scepticism The author offers an account of knowledge which can be used to shed light on different varieties of scepticism the nature and status of intuitions and epistemic normativity Virtue Epistemology and the Analysis of Knowledge Ian Church, 2023-02-09 This book centers on two dominant trends within contemporary epistemology first the dissatisfaction with the project of analyzing knowledge in terms of necessary and jointly sufficient conditions and second the surging popularity of virtue theoretic approaches to knowledge Church argues that the Gettier Problem the primary reason for abandoning the reductive analysis project cannot viably be solved and that prominent approaches to virtue epistemology fail to solve the Gettier Problem precisely along the lines his diagnosis predicts Such an outcome motivates Church to explore a better way forward non reductive virtue epistemology In so doing he makes room for virtue epistemologies that are not only able to endure what he sees as inevitable developments in 21st century epistemology but also able to contribute positively to debates and discussions across the discipline and beyond Apt Belief and Reflective Knowledge: A virtue epistemology Ernest Sosa, 2007 *Handbook of Research on Improving Allied Health Professions Education: Advancing Clinical Training and Interdisciplinary Translational Research* Almeida, Rui Pedro Pereira, 2022-05-20 Due to the current paradigm shift from traditional teaching to a mixed model with the inclusion of e learning strategies reforms in clinical education models are necessary and must carefully consider the socio professional changes needed to support such efforts Further study of the implementation of clinical and virtual reality education simulators in education the irreplaceable role of teaching in the design of advanced roles for health professionals and the role of education in the continuing professional development are all necessary for the future of successful allied health professional education The Handbook of Research on Improving Allied Health Professions Education Advancing Clinical Training and Interdisciplinary Translational Research discusses a range of important topics related to medical and health professions education and clarifies purposes processes

and future priorities in introducing changes in the educational system Covering topics such as new technologies and patient safety this major reference work is ideal for researchers practitioners academicians industry professionals instructors and students

Thinking with Assent Maria Rosa Antognazza, 2025-05-19 Epistemology is currently in ferment Ever since Plato the textbook story goes knowledge has been conceived as justified true belief but in 1963 Edmund Gettier blew a huge hole in this supposedly traditional account Six decades later however ongoing attempts to identify the conditions which turn belief into knowledge continue to face counterexamples and charges of circularity In response to this recurrent failure leading philosophers have begun exploring alternative accounts of knowledge This ground breaking book pushes the revolt against post Gettier epistemology in a radically new direction It begins by challenging the crude history of philosophy underling the entire Gettier paradigm A survey ranging from the pre Socratics to the mid twentieth century reveals that the allegedly standard or traditional analysis of knowledge is neither standard nor traditional In fact it is difficult to find major philosophers for thousands of years who regarded knowledge as a species of belief or belief as entailed by knowledge The standard view was rather that knowing and believing are distinct mutually exclusive mental states involving different mental faculties and playing distinct and complementary roles in our cognitive lives Having demolished the historical premise upon which the entire Gettier paradigm rests this book reframes elements of this age old consensus in contemporary terms which push knowledge first epistemology in a fresh direction Knowledge Antognazza argues is phenomenologically and ontologically prior to belief and crucially is not a kind of belief not even the best kind In turn mere believing is not a kind of botched knowing but a mental state fundamentally different from knowing with its own crucial and distinctive role in our cognitive life Contrary to the claim that belief aims at knowledge the specific contribution of belief to our cognition is that of aiming at truth when knowledge is out of our cognitive reach Knowing and believing are mutually exclusive but complementary ways of thinking with assent The book then applies this renewed paradigm to range of controversial issues including the taxonomy of belief the role of the will in belief testimony collective knowledge and religious epistemology Applying innovative methods to a vast range of materials on a rich variety of topics this is a rare philosopher and a work of exceptional interest

Epistemic Pluralism Annalisa Coliva, Nikolaj Jang Lee Linding Pedersen, 2017-11-08 This book examines epistemic pluralism a brand new area of research in epistemology with dramatic implications for the discipline Challenging traditional assumptions about the nature of justification an expert team of contributors explores pluralism about justification with compelling first order results including analysis of the various requisites one might want to impose on the notion of justification and therefore of knowledge and why It is shown why a long lasting dispute within epistemology about the nature of justification has reached a stalemate and how embracing a different overarching outlook might lead to progress and aid better appreciation of the relationship between the various epistemic projects scholars have been pursuing With close connections to the idea of epistemic relativism and with specific applications to various areas of contemporary

epistemology such as the debate over epistemic norms of action and assertion epistemic peers disagreement self knowledge and the status of philosophical disputes about ontology this fascinating new volume is essential reading for scholars researchers and advanced students in the discipline

Character Christian B. Miller, R. Michael Furr, Angela Knobel, William Fleeson, 2015-09-11 This collection contains some of the best new work being done on the subject of character from the perspectives of philosophy theology and psychology From creating a virtual reality simulation of the Milgram shock experiments to understanding the virtue of modesty in Muslim societies to defending soldiers moral responsibility for committing war crimes these 31 chapters break much new ground and significantly advance our understanding of character The main topics covered fall under the heading of our beliefs about character the existence and nature of character traits character and ethical theory virtue epistemology the nature of particular virtues character development and challenges to character and virtue from neuroscience and situationism These papers stem from the work of the Character Project www.thecharacterproject.com at Wake Forest University generously supported by the John Templeton Foundation This collection is truly unique in featuring the work of many young up and coming voices in their fields with new perspectives to offer Together their work will significantly shape discussions of character for years to come
