Beyond Vision Allan Jones, 2018-06-06 In this unique and exhilarating autobiography Allan Jones Canada s first blind diplomat vividly describes how an untreatable eye disease slowly decimated his visual world most challengingly during his postings in Tokyo and New Delhi and how he discovered and took to heart the revelatory Indian philosophy that changed his life Advaita Vedanta the most iconoclastic and liberating of the classical Indian philosophies profoundly altered the author s experience of self and world He found that the true self as distinct from the individual ego far exceeds the boundaries of individuality It lies beneath sightedness or blindness and is absolutely unaffected by the latter This welcome shift of perspective was reinforced by startling discoveries in contemporary physics evolutionary biology and developmental psychology that are fully consistent with Advaitic metaphysics As for the practical applications of metaphysics this book demonstrates step by step how Advaitic insight and practice significantly reduce physical and psychological tension The most telling examples have to do with adjustments compelled by extreme circumstances Thus Jones describes how he drew upon Advaitic mindfulness techniques to maintain his white cane mobility skills in the teeth of permanent spinal nerve and muscle pain The arc of Beyond Vision moves from the claustrophobically personal to the openness of the transpersonal It begins in a dysfunctional family background breaking out into a full life encompassing an adventurous foreign service career spiritual exploration and an unconventional kind of marital love

Beyond Vision Casey O'Callaghan, 2017-01-19 Beyond Vision brings together eight essays by Casey O Callaghan The

works draw theoretical and philosophical lessons about perception the nature of its objects and sensory awareness through sustained attention to extra visual and multisensory forms of perception and perceptual consciousness O Callaghan focuses on auditory perception perception of spoken language and multisensory perception The first essays concern the nature of audition s objects focusing on sounds especially drawing attention to the ways in which they contrast with vision s objects The middle essays explore forms of auditory perception that could not be explained without understanding audition s interactions with other senses This bridges work on sound perception with work on multisensory perception and it raises multisensory perception as an important topic for understanding perception even in a single modality The last essays are devoted to multisensory perception and perceptual consciousness They argue that no complete account of perception overall or of multisensory perceptual consciousness can be developed in modality specific terms perceiving amounts to more than just seeing hearing touching tasting and smelling at the same time The final essay presents a new framework for understanding what it is to be modality specific or to be multisensory

Language and Culture in the Growth of Imperialism Sharron Gu, 2012-09-13 Political science interpretations of international relations tend to focus on abstract terms of economic interest domination rights and justice Trapped within this limited horizon the discipline fails to explain why nations of similar economic structure would have variant ideas for their foreign policies and why nations with different economic structures and ideologies could develop a similar global posture during certain periods of their histories This innovative study examines imperialism from a cultural and linguistic perspective portraying the rise and fall of ancient Greek Roman medieval Islamic modern British Russian and American empires as a part of the natural life of world civilizations As these imperial cultures matured through centuries of literary accumulation and interaction with other cultures they finally found their confidence on the world stage and transitioned from an aggressive

policy towards others to a more tolerant one **Disillusioned** Jordan Bear, 2017-05-30 How do photographs compel belief and endow knowledge To understand the impact of photography in a given era we must study the adjacent forms of visual persuasion with which photographs compete and collaborate In photography s early days magic shows scientific demonstrations and philosophical games repeatedly put the visual credulity of the modern public to the test in ways that shaped and were shaped by the reality claims of photography These venues invited viewers to judge the reliability of their own visual experiences Photography resided at the center of a constellation of places and practices in which the task of visual discernment of telling the real from the constructed became an increasingly crucial element of one s location in cultural political and social relations In Disillusioned Victorian Photography and the Discerning Subject Jordan Bear tells the story of how photographic trickery in the 1850s and 1860s participated in the fashioning of the modern subject By locating specific mechanisms of photographic deception employed by the leading mid century photographers within this capacious culture of discernment Disillusioned integrates some of the most striking and puzzling images of the Victorian period into a new and expansive interpretive framework **Summary of Ken Wilber's Integral Psychology** Everest

Media, 2022-06-11T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The Great Nest of Being is the backbone of the perennial philosophy and it would be a crucial ingredient of any integral psychology It is the view that reality is made up of various levels of existence ranging from matter to body to mind to soul to spirit 2 The Great Nest is a hierarchy of levels of consciousness that exist in the universe The basic levels are the basic holons in the nest and they are qualitatively distinct levels of organization that are arranged in a nested hierarchy of increasing holistic embrace 3 The Great Nest is a multidimensional latticework of love and it transcends and includes its juniors Spirit is both the highest wave and the ever present ground of all the waves going beyond all and embracing all 4 The Great Nest of Being and Knowing is the core of the perennial philosophy and it is the part of the philosophy that has been found most enduring The evidence continues to mount in its favor human beings have access to a richly textured rainbow of consciousness spanning subconscious to self conscious to superconscious states **The Sensory Studies Manifesto** David

Howes, 2022-08-31 The senses are made not given This revolutionary realization has come as of late to inform research across the social sciences and humanities and is currently inspiring groundbreaking experimentation in the world of art and design where the focus is now on mixing and manipulating the senses The Sensory Studies Manifesto tracks these transformations and opens multiple lines of investigation into the diverse ways in which human beings sense and make sense of the world This unique volume treats the human sensorium as a dynamic whole that is best approached from historical anthropological geographic and sociological perspectives In doing so it has altered our understanding of sense perception by directing attention to the sociality of sensation and the cultural mediation of sense experience and expression David Howes challenges the assumptions of mainstream Western psychology by foregrounding the agency interactivity creativity and

wisdom of the senses as shaped by culture The Sensory Studies Manifesto sets the stage for a radical reorientation of research in the human sciences and artistic practice
