Academy Quantitative Global Fund:

Greening the Academy Samuel Fassbinder, Anthony Nocella, Richard Kahn, 2012-12-30 This is the academic Age of the Neoliberal Arts Campuses as places characterized by democratic debate and controversy wide ranges of opinion typical of vibrant public spheres and service to the larger society are everywhere being creatively destroyed in order to accord with market and military models befitting the academic industrial complex While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex friendly green campus initiatives of science technology engineering and management programs By contrast Greening the Academy Ecopedagogy Through the Liberal Arts takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability Greening the Academy thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well being of our emerging planetary community and its numerous common locales

Environmental Risk Jeanne X. Kasperson, Roger E. Kasperson, 2013-05-13 Despite international initiatives such as the Earth Summit in 1992 and ongoing efforts to implement the Kyoto Protocol human activities continue to register a destructive toll on the planetary environment At root research on global environmental risk seeks new pathways for reversing unsustainable trends curtailing ongoing destructive activities and creating a life sustaining planet This book takes stock of the distinctive challenges posed by global environmental risks the capacity of knowledge systems to identify and characterize such risks and the competence of human society to manage the unprecedented complexity Particular attention trains on engaging in ways conducive to enhancing social learning and adaptation the large uncertainties inherent in these risks Various chapters enlist different scales of analysis to explore the manifestation and causes of global environmental risks in all the diversity of their regional expression Throughout the editors and contributors accord prominence to the vulnerability of people and places to environmental degradation Understanding vulnerability is a neglected key to assessing the nature of the risks and determining strategies for altering trajectories of threat Global risk futures the editors argue are not intractable and are still amenable to a risk analysis enterprise that is democratic in principle humanistic in concept and geared to the realities that pertain to the particular societies locales and regions that will ultimately bear the risk **The Autocratic Academy**

Timothy V. Kaufman-Osborn, 2023-03-06 Critics of contemporary US higher education often point to the academy's corporatization as one of its defining maladies However in *The Autocratic Academy* Timothy V Kaufman Osborn argues that American colleges and universities have always been organized as corporations in which the power to rule is legally vested in and monopolized by antidemocratic governing boards This institutional form Kaufman Osborn contends is antithetical to the free inquiry that defines the purpose of higher education Tracing the history of the American academy from the founding of Harvard 1636 through the Supreme Court's *Dartmouth v Woodward* ruling 1819 and into the twenty first century Kaufman Osborn shows how the university's autocratic legal constitution is now yoked to its representation on the model of private property Explaining why appeals to the cause of shared governance cannot succeed in wresting power from the academy's autocrats Kaufman Osborn argues that American universities must now be reincorporated in accordance with the principles of democratic republicanism Only then can the academy's members hold accountable those chosen to govern and collectively determine the disposition of higher education's unique public goods **Accomplishments of the U.S. Global Change**
