Access Information Social Justice Brownlee:

Freedom of Information and Social Science Research Design Kevin Walby, Alex Luscombe, 2019-11-25 This multidisciplinary volume demonstrates how Freedom of Information FOI law and processes can contribute to social science research design across sociology criminology political science anthropology journalism and education Comparing the use of FOI in research design across the United Kingdom the United States Australia Canada and South Africa it provides readers with resources to carry out FOI requests and considers the influence such requests can have on debates within multiple disciplines In addition to exploring how scholars can use FOI disclosures in conjunction with interview data archival data and other datasets this collection explains how researchers can systematically analyse FOI disclosures Considering the challenges and dilemmas in using FOI processes in research it examines the reasons why many scholars continue to rely on more easily accessible data when much of the real work of governance the more clandestine but consequential decisions and policy moves made by government officials can only be accessed using FOI requests Disarm, Defund, Dismantle Shiri Pasternak, Kevin Walby, Abby Stadnyk, 2022 Canadian laws are just the police uphold the rule of law and treat everyone equally and without the police communities would descend into chaos and disorder These entrenched myths rooted in settler colonial logic work to obscure a hard truth the police do not keep us safe This edited collection brings together writing from a range of activists and scholars whose words are rooted in experience and solidarity with those putting their lives on the line to fight for police abolition in Canada Together they imagine a different world one in which police power is eroded and dissolved forever one in which it is possible to respond to distress and harm with assistance and care **The Routledge Handbook of Male Sex Work, Culture, and Society** John Geoffrey Scott, Christian Grov, Victor Minichiello, 2021-03-21 Panoramic and provocative in its scope this handbook is the definitive guide to contemporary issues associated with male sex work and a must read for those who study masculinities male sexuality sexual health and sexual cultures This groundbreaking volume will have a powerful impact on our understanding of this challenging elusive subject While the internet has brought the previously hidden worlds of male sex work more starkly into public view academic research has often remained locked into descriptions of male sex workers and their clients as perverse Drawing from a variety of regions the chapters provide insights into the historical popular cultural social and economic aspects of sex work as well as demographic patterns health outcomes and policy issues This approach shifts thought on male sex work from a hidden social problem to a publicly acknowledged social phenomenon The book challenges myths and reconceptualizes male sex work as a discrete field Importantly it provides a vehicle for the voices of male sex workers and new and established scholars This richly detailed humane and innovative collection retrieves male sex work from silence and invisibility on the one hand and its association with scandal and stigma on the other The findings within have profound implications for how governments approach public health and regulation of the sex industry and for how society can make sense of the complexities of human

sexualities A compelling scholarly read and a major contribution to a commercial sector that is often neglected in policy debates on sex work this handbook will be of great interest to scholars of criminology sociology gender studies and cultural studies and all those interested in male sex work Understanding Spatial Media Rob Kitchin, Tracey P. Lauriault, Matthew W. Wilson, 2017-02-06 Over the past decade a new set of interactive open participatory and networked spatial media have become widespread These include mapping platforms virtual globes user generated spatial databases geodesign and architectural and planning tools urban dashboards and citizen reporting geo systems augmented reality media and locative media Collectively these produce and mediate spatial big data and are re shaping spatial knowledge spatial behaviour and spatial politics Understanding Spatial Media brings together leading scholars from around the globe to examine these new spatial media their attendant technologies spatial data and their social economic and political effects The 22 chapters are divided into the following sections Spatial media technologies Spatial data and spatial media The consequences of spatial media Understanding Spatial Media is the perfect introduction to this fast emerging phenomena for students and practitioners of geography urban studies data science and media and communications *Violence, Imagination, and Resistance* Katrin Roots, 2023-05-25 Much of the discussion of social transformation and resistance in socio legal studies centres around the question of whether and how the law can be used to achieve practical change However the editors of this volume argue that it will never be possible to enact change through the law because it is inseparable from violence be it metaphysical social or political They posit that a just world free from oppressive power relations requires us to imagine communities where the state and its law cease to exist Contributors address the underexplored questions of what alternatives to law could look like how communities could organize their everyday lives and how they could address social and interpersonal conflicts outside of an apparatus of violence These essays contribute to the ongoing interrogation of settler colonialism racism and structural violence in Canada by demonstrating how to expose the violence the law produces how to deconstruct law s power and finally how to identify modes of resistance that have transformative potential *Motherhood and Social Exclusion* Christie Byvelds, 2019-06-01 Though the negative effects of social exclusion are well documented there is a paucity of research on women s experiences of social exclusion as they relate to mothering within the institution of motherhood Social exclusion is a socially constructed concept it refers to a multi dimensional form of systematic discrimination driven by unequal power relationships It is the denial of equal opportunities resources rights goods and services for some by others within economic social cultural and political arenas Carrying birthing and mothering children place women in a unique position to face social exclusion based on their role as mothers Perhaps at no other time in our lives could we benefit more from feeling as though we are engaged in our community than when we enter into and are experiencing the patriarchal institution of motherhood As the widely used proverb states It takes a village to raise a child it also takes a village of societal institutions to support mothers Saint Mary s University *Critical Perspectives on Social*
