Theoretical and Experimental Studies on Novel High-Gain Seeded Free-Electron Laser Schemes Chao Feng,2015-12-18 This dissertation focuses on the study of novel high gain free electron laser FEL operation schemes with external seed lasers The technique of manipulating the phase space of the electron beam which is widely used in novel seeded FEL schemes is systematically studied Several novel FEL schemes are proposed for the generation of intense coherent FEL pulses with short wavelength sub femtosecond pulse length or multiple carrier frequency properties which meet the needs of FEL users Results of experiments are described for the recently proposed FEL schemes such as echo enabled harmonic generation and cascaded high gain harmonic generation New photon electron beam diagnostic methods are also developed for these experiments and future high gain FEL facilities

Probabilistic Safety Assessment and Management Cornelia Spitzer,Ulrich Schmocker,Vinh N. Dang,2014-01-04 Probabilistic Safety

Assessment and Management is a collection of papers presented at the PSAM 7 ESREL 04 Conference in June 2004. The joint Conference provided a forum for the presentation of the latest developments in methodology and application of probabilistic and reliability methods in various industries. The aim of these applications is the optimisation of technological systems and processes from the perspective of a risk informed safety management while also taking economic and environmental aspects into account. Bringing together leading experts from all over the world, the papers reflect a wide variety of disciplines such as principles and theory of reliability and risk analysis, systems modelling and simulation, consequence assessment, human and organisational factors, structural reliability methods, software reliability and safety insights and lessons from risk studies and management decision making.

Free Electron Lasers 2000 V.N. Litvinenko, Y.K. Wu, 2005-12-27. The 22nd International Free Electron Laser Conference and 7th FEL User Workshop were held August 13-18, 2000 at Washington Duke Inn and Golf Club in Durham, North Carolina, USA. The conference and the workshop were hosted by Duke University's Free Electron Laser FEL Laboratory. Following tradition, the FEL prize award was announced at the banquet. The year 2000 FEL prize was awarded to three scientists propelling the limits of high power FELs: Steven Benson, Eisuke Minehara and George Neill. The conference program was comprised of traditional oral sessions on First Lasing, FEL theory, storage ring FELs, linac and high power FELs, long wavelength FELs, SASE FELs, accelerator and FEL physics and technology, and new developments and proposals. Two sessions on accelerator and FEL physics and technology reflected the emphasis on the high quality of accelerators and components for modern FELs. The breadth of the applications was presented in the workshop oral sessions on materials processing, biomedical and surgical applications, physics and chemistry as well as on instrumentation and methods for FEL applications. A special oral session was dedicated to FEL center status reports for users to learn more about the opportunities with FELs. As usual, the oral sessions were supplemented by poster sessions with in-depth discussions and communications. The FEL physicists and FEL users had excellent opportunities to interact throughout the duration of the event, culminating in a Joint Session. The year 2000 was very successful, being marked by lasing with two SASE and one storage ring short wavelength FELs and by the first human surgery with the use of FEL. To mention but a few: The International Program Committee and chairs of the sessions had the challenging and exciting problem of selecting invited and contributed talks for the conferences and the workshop from the influx of abstracts mentioning new results and ideas. The success of the conference was determined by these contributions. Scientists from 15 countries gave 70 talks, presented 176 posters and submitted 146 papers which are published in the present volume of proceedings.
