

Astronomy Ranking Task: Doppler Shift

Question #1:

Scenario: The Space Shuttle *Orion* is just launching toward the right and emitting its radio waves. People are located at locations A, B, and C. Assume that all three people can hear the radio (transmit) beam.

1. **Ranking Question:** Rank the pitch of the radio (transmitted) beam as measured by observers (A, B, C).

Ranking Student: Observer A > B > C > B > A (circle)

On the provided graph, please record the value _____ (fill in with circle number).

Explain: explain your reasoning for ranking this way.

Person A is the closest to the shuttle so the highest radio frequency. Person B, who is moving away from the shuttle would hear a lower frequency. The frequency will become higher further away as person C is further away the radio waves have the frequency. Person B is the pitch hearing heard from the radio transmitting radio wave.

2. **Ranking Question:** Rank the wavelength (transmitted) as measured by the radio waves as heard by each person (A, B, C).

Ranking Student: Observer A > B > C > B > A (circle)

On the wavelength graph, please fill in each person _____ (fill in with circle number).

Explain: explain your reasoning for ranking this way.

Observer the wavelength higher the closest wavelength but person C. Observer the longer the wavelength the further away from between observer.
