IAU XXVI General Assembly this volume of the IAU Highlights of Astronomy covers virtually all aspects of modern astrophysics as discussed by 2400 participants from 73 countries. Notably the common aspects of astrophysical phenomena known to exist in widely differing interstellar environments is thoroughly examined providing fertile cross correlation from one specialisation to another. This text highlights the importance of the triennial IAU General Assemblies in bringing together the work of observers and theoreticians in widely different fields but working towards a common goal understanding the physics of the Universe. Together with the Proceedings of the IAU Symposia 235-240 this volume examines all of the astrophysics presented at the General Assembly.

Sea-Level Science David Pugh, Philip Woodworth, 2014-04-24 Understanding sea level processes such as ocean tides, storm surges, tsunamis, El Niño and rises caused by climate change is key to planning effective coastal defence. Building on David Pugh's classic book Tides, Surges and Mean Sea Level this substantially expanded full colour book now incorporates major recent technological advances in the areas of satellite altimetry and other geodetic techniques particularly GPS. Tsunami science, measurement of mean sea level and analyses of extreme sea levels. The authors discuss how each surveying and measuring technique complements others in providing an understanding of present day sea level change and more reliable forecasts of future changes. Giving the how and the why of sea level change on timescales from hours to centuries this authoritative and exciting book is ideal for graduate students and researchers in oceanography, marine engineering, geodesy, marine geology, marine biology and climatology. It will also be of key interest to coastal engineers and governmental policy makers.
