

FOR METAL TURNING, lathe bit is held in tool block mounted on the carriage.

FOR BORING large holes in the lathe a boring tool is set parallel with bed.

FOR THREADING a master bushing advances the threading attachment's tool bit.

FOR DRILLING the headstock mounts on auxiliary column, lever advances spindle.

just as accurately as the world's leading toolmakers. Using appropriate accessories, you can also set up the Unimat as a small bench grinder, circular saw, jig saw, shaper, planer, flexible shaft tool, disc sander. On the one machine you can accomplish virtually any machining job in any common material, whether metal, plastic or wood, with the size of the work the only limitation. The accompanying photos show some—but by no means all—of the many ways the tool can be set up.

Since it can perform such a variety of machining operations on small workpieces, the Unimat is a simply marvelous tool for home-shop modelbuilding and craftwork. Using a Unimat an amateur modelbuilder can readily machine the special metal parts and fittings he needs to give his models professional finish. More than that, with a Unimat he's toolled up for projects he couldn't otherwise hope to tackle. He's able to machine model ship, locomotive, aircraft or automotive parts to exact scale from original blueprints. He can build his own work-

ing-model gas, steam or diesel engines right down to the last screw. If he wants to model an architectural structure, he can use the Unimat's woodworking accessories to cut and plane accurately-finished miniature timbers and planks. Because the Unimat itself is a scaled-down version of the actual production machines used to make the real equipment modelmakers model, it's possible with this remarkable little tool to build beautifully-detailed scale models of nearly anything.

The Unimat makes precision metal-machining so simple that with only a few hours' practice an amateur modelbuilder having no previous machine-tool experience whatever will be able to turn out machined metal parts that compare in every way with parts made commercially on expensive automatic equipment. For amateur craftsmen, and particularly for youngsters, the Unimat offers both adventure and education. It opens an entirely new, wide-scope field of interest.

But while the machine is wonderful for hobblers, a great many of the 100,000

FOR DISC SANDING wood or metal an abrasive disc is cemented to the sanding plate.

FOR PLANING wood, motor is fixed and planing attachment is clamped on spindle.

FOR CIRCULAR SAWING the saw attachment's table mounts on the cross slide.
