Alex Moseley, Nicola Whitton, 2013-09-05 A growing interest in the use of games based approaches for learning has been tempered in many sectors by budget or time constraints associated with the design and development of detailed digital simulations and other high end approaches However a number of practitioners and small creative groups have used low cost traditional approaches to games in learning effectively involving simple card board or indoor outdoor activity games New Traditional Games for Learning brings together examples of this approach which span continents UK western and eastern Europe the US and Australia sectors education training and business and learner styles or ages primary through to adult and work based learning or training Together the chapters provide a wealth of evidence based ideas for the teacher tutor or trainer interested in using games for learning but turned off by visible high end examples An editors introduction pulls the collection together identifying shared themes and drawing on the editors own research in the use of games for learning The

book concludes with a chapter by a professional board game designer incorporating themes prevalent in the preceding chapters and reflecting on game design development and marketing in the commercial sector providing valuable practical advice for those who want to take their own creations further
