Meaning without Truth Stefano Predelli,2013-07-11 Stefano Predelli presents an original account of the relationships between the central semantic notions of meaning and truth Part One begins with the study of phenomena that have little or nothing to do with the effects of meaning on truth Predelli warns against what he calls the Fallacy of Misplaced Character and is concerned with sentences such as there sometimes exist sentences containing exactly eight words I am now uttering a non contradictory sentence or I exist In Part Two he moves on to further cases which bear no interesting relations with questions of truth but which unlike those in Part One have important repercussions on questions of meaning The resulting Theory of Bias is applied to expressive interjections with a chapter about the logical properties of *alas* to instances of register and coarse slang to honorifics and nicknames and to derogatory slurs Part Three draws from the previous two parts and argues that some notorious semantic problems ought to be approached from the viewpoint of the Theory of Bias Predelli starts with vocatives dates and signatures and introduces the notion of obstinate indexicality which then guides his solution to Quine's Giorgione puzzle his version of the demonstrative theory quotation and his defence of the bare boned approach to demonstratives and demonstrations

A Democratic Theory of Truth Linda M. G. Zerilli, 2025-04-25 A critique of the concept of truth presupposed by the post truth debate and a bold new vision for a more pluralistic citizenry We say that we live in a post truth era because disinformation threatens our confidence in the existence of a shared public world Affirming objective truth may therefore seem necessary to save democracy According to political theorist Linda M G Zerilli such affirmation can stifle political debate and silence dissent In fact Zerilli argues that the unqualified insistence on objective truth is as dangerous for democracy as denying it Drawing on Arendt Foucault and Wittgenstein A Democratic Theory of Truth challenges the concept of truth presupposed by the post truth debate It argues that we the people have an essential role in discovering and evaluating any truth relevant to the political realm The result is a striking defense of plurality dissent and opinion in contemporary democratic societies
