Declaring Disaster Timothy W. Kneeland, 2021-05-25 On Friday January 28 1977 it began to snow in Buffalo The second largest city in New York State located directly in line with the Great Lakes snowbelt was no stranger to this kind of winter weather With their city averaging ninety four inches of snow per year the citizens of Buffalo knew how to survive a snowstorm But the blizzard that engulfed the city for the next four days was about to make history Between the subzero wind chill and whiteout conditions hundreds of people were trapped when the snow began to fall Twenty to thirty foot high snow drifts isolated residents in their offices and homes and even in their cars on the highway With a dependency on rubber tire vehicles which lost all traction in the heavily blanketed urban streets they were cut off from food fuel and even electricity This one unexpected snow disaster stranded tens of thousands of people froze public utilities and transportation and cost Buffalo hundreds of millions of

dollars in economic losses and property damages The destruction wrought by this snowstorm like the destruction brought on by other natural disasters was from a combination of weather related hazards and the public policies meant to mitigate them Buffalo s 1977 blizzard the first snowstorm to be declared a disaster in US history came after a century of automobility suburbanization and snow removal guidelines like the bare pavement policy Kneeland offers a compelling examination of whether the 1977 storm was an anomaly or the inevitable outcome of years of city planning From the local to the state and federal levels Kneeland discusses governmental response and disaster relief showing how this regional event had national implications for environmental policy and how its effects have resounded through the complexities of disaster politics long after the snow fell **Broadcasting & Cable** ,2006 **The New York Times Index** ,2002 *BIA's Radio Yearbook* ,2005
