Chapter 11- Cell Communication

Chapters 9, 10, and 11 form three of the most difficult chapters in the book. The special challenge in Chapter 11 is not that the material is so difficult, but that most of the material will be completely new to you. Cell communication is normally not covered in standard high school biology books, yet perhaps no other section of biology has grown as much as cell signaling has in the last ten years. Take your time with this section, and you will be rewarded with a knowledge base that will be most helpful in this course and courses to come.

Concept 11.1 External signals are converted into responses within the cell

1. What is a signal transduction pathway?
2. How does yeast mating serve as an example of a signal transduction pathway?
3. Complete the chart of local chemical signaling in cell communication in animals

Local Signaling Types	Specific Example
Paracrine	
Synaptic	

4. How does a hormone qualify as a long-distance signaling example?
5. A signal transduction pathway has three stages. Use Figure 11.6 to label the missing parts of the preview figure below, and then explain each step
