A FOCUS ON SCIENTIFIC SKILLS The third edition does even more to teach students the skills they need to think like a scientist along with the content they need to move beyond the introductory course

New Skills Primers are self paced tutorials that guide students to learn practice and use skills like data visualization experimental design working with numbers and more

New How Do We Know activities accompany the feature in the text and teach students to understand scientific inquiry

THE HUB The best teaching resources in the world aren't of use if instructors can't find them The HUB provides a one stop destination for valuable teaching and learning resources including all of our well vetted in class activities

IMPROVED ORGANIZATION OF TOPICS We implemented several organizational changes based on extensive user feedback with the goal of creating an improved narrative for students and a more flexible teaching framework for instructors

A new chapter on **Animal Form Function and Evolutionary History** leads off the animal anatomy and physiology chapters to provide a whole body view of structure and function and to provide better context for the more specific systems in following chapters

The ecology coverage has been enriched and reorganized for a more seamless flow

A new chapter on **Ecosystem Ecology** combines ecosystem concepts formerly housed in separate chapters to present a more cohesive view of the flow of matter and energy in ecosystems

All of these changes and improvements represent the next step in the life of **Biology: How Life Works**

We think we have created the best learning resource for introductory biology students and we think instructors will find joy in the improvements they can make in their classes with these materials
