

Biology Exam 1 Study Guide

Lecture 1 → Introduction to Biological Science

Tree of Life

- Domains
 - Eukarya → visible life
 - Split into animals and plants
 - Very small portion
 - Bacteria → single cell
 - Make up most of life's branches
 - Symbionts that evolved into mitochondria and chloroplasts were eubacteria
 - Archaea → original domain of life
 - More closely related to eukaryotes than eubacteria, first branch of life
 - Basic split between archaea and bacteria
- Candidate phyla radiation: Single species have been identified, each identifies an entire phylum which is yet to be understood - pioneer species (tree is dominated by new species that scientists have never seen before)
- Species disappearing faster than can be recovered
- Eukaryotes and archaea are most closely related branches

Destruction and Mass Extinction

- One million species face imminent extinction because of humans
- Recent past → >50% vertebrates/>75% flying insects lost in the past <50 years
- Critically threatened → >40% amphibians, >30% plants/corals/sharks, >25% mammals
- Populations and extinctions have increased

Theory of Evolution

- Evolution: all life on earth evolved from a common ancestor, most properties within cells work in the same way, the change in gene distribution over time within a population
- Theory: a very well substantiated idea that explains many overlapping phenomena at once, wide-ranging, strongest. Not a hypothesis
- Darwin: species arise through random mutation and natural selection for fitness
- Evidence (fewer than 40% of Americans believe in evolution)
 - fossil record shows conservation of homologous structures
 - Molecular proof: same DNA and RNA protein in cells
 - Homologous function in hands and fins → evolved similar mechanisms in appendages
- Scopes Monkey Trial
 - Scopes taught evolution illegally; resulted in Butler Act → forbid teaching evolution in TN
- Endosymbiont theory
 - Single composite cell of greater complexity could evolve from two or more separate simpler living cells in a symbiotic relationship

Year of Earth's History

- 1 Jan: earth formed 4.54 bya by acceleration of material from the solar nebula via gravitational collapse, conditions were incompatible with life, bombarded with asteroid-sized meteors for 800 million years
- 4 Mar: by 3.8 bya bombardment had slowed, Earth had cooled to lower the temps "compatible" with life

Biology Study Guide Workbook

Arnold J. Karpoff

Biology Study Guide Workbook:

Biology Aaron O. Wasserman,1973 *AP Biology Notes* On Target Publishing,2019-04-26 **AP Biology Notes** When trying to learn biology there are EASY ways and Hard ways Keeping a biology notebook is the easy way and is ESSENTIAL to your success Here is some of what you are getting This 8 x 10 AP Biology paperback book is perfect for taking class notes By keeping a notebook you will quickly notice an increase in your focus and memory retention as well as your biology grades 120 blank college ruled lined pages to allow plenty of room for class notes This page design makes learning biology a snap PLUS there s plenty of space available to make a note of those areas that need a bit more study so you don t forget The glossy cover is made to industry standards and designed to last LARGE 8 x 10 size plenty of room for your notes yet fits in any backpack or other school book bag Take it wherever you go so it will be handy whenever the urge to study strikes Not only is this notebook large enough for all your needs 8x10 it is a full 120 pages in length This blank composition notebook makes a great gift for any biology student Scroll up and grab YOUR copy of AP Biology Notes RIGHT NOW **AP Biology**
