Judaism Arabic and Hebrew sociolinguistics and Arabic Bible translation Within Medieval Judaism the Karaite Jews became a prosperous community under the banners of Islam One of the most salient signs of the Karaite community's strength and internal cohesion was the extensive scientific contribution that it made to the fields of Biblical studies Hebrew philology and philosophy This book presents for the first time a critical edition of one of the works of the leading Karaite scholars in biblical exegeses and translation Japheth ben Ali's Judaeo Arabic translation of the Book of Jeremiah drawing on five medieval manuscripts As the majority of Karaite works including Bible manuscripts are in Judaeo Arabic relatively few of them have been published A number of the Karaite Bible manuscripts were written in Arabic script resulting in their being neglected by scholars despite the significance of these manuscripts to the history of medieval Judaism and Bible textual Studies The author of this volume focuses on some of the most important issues in the field of sociolinguistics namely language contact diglossia and the status of both Arabic and Hebrew in the medieval Jewish literary system Equally important is the issue of the script in use Hebrew or Arabic which was a major subject of debate among the Rabbinate and the Karaites Indeed the language and the script used in these manuscripts will help us re-evaluate the established theories about the language situation and literary systems in medieval Islamic and Jewish societies The value of translating the Hebrew Bible into Arabic was unparalleled in medieval inter religious scholarship For Muslim scholars it was their only access to the Jewish Bible The contribution of the Karaites to this field is enormous and this work offers us a unique window into the Karaite theory of Biblical hermeneutics

The History and Practice of Ancient Astronomy James Evans, 1998-10-01 The History and Practice of Ancient Astronomy combines new scholarship with hands on science to bring readers into direct contact with the work of ancient astronomers While tracing ideas from ancient Babylon to sixteenth century Europe the book places its greatest emphasis on the Greek period when astronomers developed the geometric and philosophical ideas that have determined the subsequent character of Western astronomy The author approaches this history through the concrete details of ancient astronomical practice

Carefully organized and generously illustrated the book can teach readers how to do real astronomy using the methods of ancient astronomers For example readers will learn to predict the next retrograde motion of Jupiter using either the arithmetical methods of the Babylonians or the geometric methods of Ptolemy They will learn how to use an astrolabe and how to design sundials using Greek and Roman techniques The book also contains supplementary exercises and patterns for making some working astronomical instruments including an astrolabe and an equatorium More than a presentation of astronomical methods the book provides a critical look at the evidence used to reconstruct ancient astronomy It includes extensive excerpts from ancient texts meticulous documentation and lively discussions of the role of astronomy in the various cultures Accessible to a wide audience this book will appeal to anyone interested in how our understanding of our place in the universe has changed and developed from ancient times through the Renaissance *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 *Networked Digital Technologies, Part II* Filip Zavoral,Jakub Yaghob,Pit Pichappan,Eyas El-Qawasmeh,2010-06-30 On behalf of the NDT 2010 conference the Program Committee and Charles University in Prague Czech Republic we welcome you to the proceedings of the Second International Conference on Networked Digital Technologies NDT 2010 The NDT 2010 conference explored new advances in digital and Web technology applications It brought together researchers from various areas of computer and information sciences who addressed both theoretical and applied aspects of Web technology and Internet applications We hope that the discussions and exchange of ideas that took place will contribute to advancements in the technology in the near future The conference received 216 papers out of which 85 were accepted resulting in an acceptance rate of 39% These accepted papers are authored by researchers from 34 countries covering many significant areas of Web applications Each paper was evaluated by a minimum of two reviewers Finally we believe that the proceedings document the best research in the studied areas We express our thanks to the Charles University in Prague Springer the authors and the organizers of the conference **OE [publication]**,1967
