

DOWNSPOUTS-MANUFACTURED

Figure 1-27 provides information on standard manufactured downspout pipe and elbows.

Figure 1-28A illustrates a typical application which employs a rectangular corrugated downspout and "K" and "W" type elbows (Figure 1-28C). The downspout is joined to the gutter by means of an outlet tube (see Figures 1-24 and 1-25).

joints in downspout systems are made so that the top section fits inside the lower section, where it is necessary to cut the downspout between runs the vertical, the downspout must be pitched. Avoid the use of elbows in long areas. Figure 1-28B shows shapes of standard

downspouts. Table 1-8 shows sizes in which pipe are available and the elbow nominal size for each size. In long areas, the rectangular corrugated (RT) and the round corrugated (RC) are recommended.

Style "A" (Figure 1-28C) is a rectangular corrugated elbow formed on the wide dimension, while Style "B" is formed on the narrow dimension. Not shown but elbows are also round and corrugated round elbows. All elbows are available in 45, 60, 75, and 90 degrees.

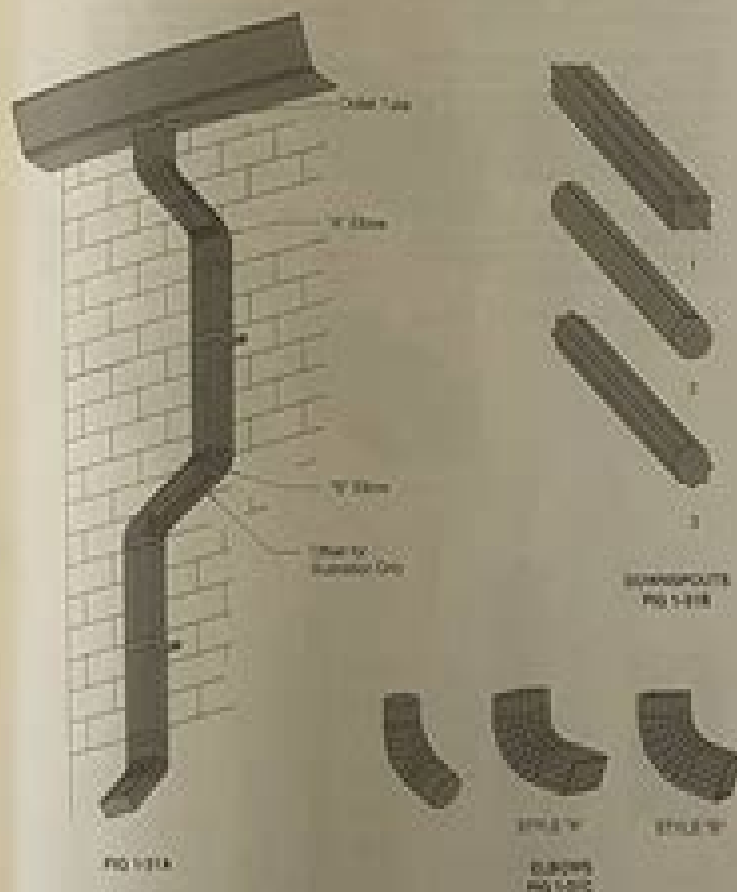

Refer to Figures 1-1 and 1-2 for rectangular gutter design information and details.
