

An abstract architectural illustration featuring a series of nested rectangular and arched frames. The composition is dominated by a large, light blue semi-circular arch at the top, which frames the main title. Below this, a series of brown and blue rectangular frames create a sense of depth and perspective, leading the eye towards a central opening. The color palette is muted, consisting of earthy browns, a dusty blue, and a pale sky blue. The overall style is minimalist and geometric, evoking a sense of modern Islamic architecture.

Blair, Jonathan M. Bloom, 1996-09-25 They discuss for example how the universal caliphs of the first six centuries gave way to regional rulers and how in this new world order Iranian forms techniques and motifs played a dominant role in the artistic life of most of the Muslim world the one exception was the Maghrib an area protected from the full brunt of the Mongol invasions where traditional models continued to inspire artists and patrons By the sixteenth century say the authors the eastern Mediterranean under the Ottomans and the area of northern India under the Mughals had become more powerful and the Iranian models of early Ottoman and Mughal art gradually gave way to distinct regional and imperial styles *Routledge Handbook of Islam in the West* Roberto Tottoli, 2022-02-21 With new topics and contributions this updated second edition discusses the history and contemporary presence of Islam in Europe and America The book debates the relevance and multi faceted participation of Muslims in the dynamics of Western societies challenging the changing perception on both sides Collating over 30 chapters written by experts from around the world the volume presents a wide range of perspectives Case studies from the Muslim presence in the Iberian Peninsula between the Middle Ages and the modern age set off the Handbook along with an outline of Muslims in America up to the twentieth century The second part covers concepts around new conditions in terms of consolidating identities the emergence of new Muslim actors the appearance of institutions and institutional attitudes the effects of Islamic presence on the arts and landscapes of the West and the relational dynamics like ethics and gender Exploring the influence of Islam particularly its impact on society culture and politics this interdisciplinary volume is a key resource for policymakers academics and students interested in the history

and archaeological evidence The monuments of the Suhrawardi Order which are derived from the basic lodges set up by Pir Shams in the region constitute a unique building archetype The book s greatest strength lies in its archaeological evidence and in showing the metaphysical commonalities between Shi ism Isma ilism and the Suhrawardi Sufi Order both of which complement each other In addition working on premise and supposition certain reanalysed historical periods and events in Indian Muslim history serve as added proof for the author s argument

Mid-Century Modernism in Turkey Meltem Gürel, 2018-02-05 Mid Century Modernism in Turkey studies the unfolding of modern architecture in Turkey during the 1950s and 1960s The book brings together scholars who have carried out extensive research on post WWII modernism in a global context The authors situate Turkish architectural case studies within an international framework during this period providing a close reading of how architectural culture responded to ubiquitous post war ideas and ideals and how it became intertwined with politics of modernization and urbanization This book contributes to contemporary scholarship to reconsider post war architecture beyond canonical explanations
