Heresy and Borders in the Twentieth Century Karina Jakubowicz, Robert Dickins, 2021-03-10 This book explores the shifting and negotiated boundaries of religion spirituality and secular thinking in Britain and North America during the twentieth century It contributes to a growing scholarship that problematises secularization theory arguing that religion and spirituality increasingly took diverse new forms and identities rather than simply being replaced by a monolithic secularity The volume examines the way that thinkers writers and artists manipulated and reimagined orthodox belief systems in their work using the notion of heresy to delineate the borders of what was considered socially and ethically acceptable It includes topics such as psychospiritual approaches in medicine countercultures and religious experience and the function of blasphemy within supposedly secular politics The book argues that heresy and heretical identities established fluid borderlands These borderlands not only blur simple demarcations of the religious and secular in the twentieth century but also infer new forms of heterodoxy through an exchange of ideas This collection of essays offers a nuanced take on a topic

that pervades the study of religion It will be of great use to scholars of Heresy Studies Religious Studies and Comparative Religion Social Anthropology History Literature Philosophy and Cultural Studies **International Comparative Approaches to Free Speech and Open Inquiry (FSOI)** Luke C.
