Aristotle Problems Volume I S 1 19 Loeb Classical Library:

The Transformational Role of Discipleship in Mark 10:13-16 Katherine Joy Kihlstrom Timpfe, 2021-10-07 Katherine Joy Kihlstrom Timpfe addresses a gap in scholarship by answering the question how is a child supposed to be the model recipient of the kingdom of God While most scholarship on Mark 10 13 16 agrees that children are metaphorically employed because of their qualities of dependence Timpfe argues that it is more specifically an image of the disciple's radical transformation which both mirrors and reverses the traditional rites of passage by which a child became an adult Timpfe suggests that Jesus by insisting that one must enter the Kingdom of God as a child invokes two interlacing images First to enter the Kingdom of God one must be fundamentally transformed and changed Second this transformation reverses the rite by which a child would have become an adult removing the adult's superior status Beginning with a summary of the scholarship surrounding children in the Bible Timpfe explores the perception of children in the ancient world their rites of passage and entrance into adulthood and contrasting this with the processing of entering the kingdom of God while also highlighting childish characters in Mark Timpfe concludes that to enter into the kingdom as a child means that one must strip off those things one gained by leaving childhood behind wealth respect family much like Jesus who throughout Mark's Gospel moves from powerful to powerless respected to despised and accepted by all to rejected even seemingly by God Jesus models transformation to childhood in an emphasis on what the Kingdom of God is like **Tome 2: Plants. Botany,**

Huppes-Cluysenaer, Nuno M.M.S. Coelho, 2018-02-13 In this book experts from the fields of law and philosophy explore the works of Aristotle to illuminate the much debated and fascinating relationship between emotions and justice Emotions matter in connection with democracy and equity they are relevant to the judicial enforcement of rights legal argumentation and decision making processes in legislative bodies and courts The decisive role that emotions feelings and passions play in these processes cannot be ignored not even by those who believe that emotions have no legitimate place in the public sphere A

growing body of literature on these topics recognizes the seminal insights contributed by Aristotle This book offers a comprehensive analysis of his thinking in this context as well as proposals for inspiring dialogues between his works and those written by a selection of modern and contemporary thinkers As such the book offers a valuable resource for students of law philosophy rhetoric politics ethics and history but also for readers interested in the ongoing debate about legal positivism and the relevance of emotions for legal and political life in today s world **Ethics of Maimonides** Hermann

Cohen,2003-01-12 Hermann Cohen s essay on Maimonides ethics is one of the most fundamental texts of twentieth century Jewish philosophy correlating Platonic prophetic Maimonidean and Kantian traditions Almut Sh Bruckstein provides the first English translation and her own extensive commentary on this landmark 1908 work which inspired readings of medieval and rabbinic sources by Leo Strauss Franz Rosenzweig and Emmanuel Levinas Cohen rejects the notion that we should try to understand texts of the past solely in the context of their own historical era Subverting the historical order he interprets the ethical meanings of texts in the light of a future yet to be realized He commits the entire Jewish tradition to a universal socialism prophetically inspired by ideals of humanity peace and universal justice Through her own probing commentary on Cohen s text like the margin notes of a medieval treatise Bruckstein performs the hermeneutical act that lies at the core of Cohen s argument she reads Jewish sources from a perspective that recognizes the interpretive act of commentary itself

HEAR Danilo Mandic,Caterina Nirta,Andrea Pavoni,Andreas Philippopoulos-Mihalopoulos,2023-02-14 Hearing is an intricate modality of sensory perception It is continuously enfolded in the surroundings in which it takes place While passive in its disposition hearing is integral to the movement and fluctuations of one s environment At all times hearing remains open in active but attuned to the present and continuously immersed in the murmur of its background A delicate perception that is always situated but fundamentally overarching and extended into the open Hearing is an immanent modality of being in and with the world Beyond the capacity of sensory perception hearing is also the ultimate juridical act a sense making activity that adjudicates and informs the spatio temporal acoustics of justice This penultimate volume of *Law and the Senses* gathers contributions from across different disciplines working on the relationship between law and hearing the human vocalisations and non human echolocations the spatial and temporal conditions in which hearing takes place as well as the forms of order and control that listening entails Through notions and practices of improvisation and noise attunement and audibility sonic spatiality and urban sonicity they explore challenge and expand the structural and sensorial qualities of law Moreover they recognise how hearing directs us to perceiving and understanding the intrinsic acoustic sphere of simultaneous relations which challenge and break the normative distinctions that law informs and maintains In an attempt to hear the ambiguous indefinable and unembodied nature of hearing as well as its objects sound and silence this volume approaches hearing as both an ontological and epistemological device to think with and about law Edmund Spenser and Animal Life Rachel Stenner,Abigail Shinn,2024-02-20 This book is the first extended critical study of the early modern poet Edmund Spenser

The Aristotelian Mirabilia and Early Peripatetic Natural Science Arnaud Zucker, Robert Mayhew, Oliver Hellmann, 2024-02-13 This is the first volume devoted to the sections of the *Aristotelian Mirabilia* on natural science filling a significant gap in the history of the Aristotelian study of nature and especially of animals The chapters in this volume explore the *Mirabilia* or *De mirabilibus auscultationibus* On Marvelous Things Heard and its engagement with the natural sciences The first two chapters deliver an introduction to this work one a discussion of the history of the text and the other a discussion of Aristotelian epistemology and methodology and the role of the *Mirabilia* in that context This is followed by eight chapters that together are effectively a commentary on those sections of the *Mirabilia* with close connections to Aristotle's *Historia animalium* and to a number of Theophrastus scientific treatises Finally the volume ends with two chapters on thematic topics connected to natural science running throughout the work namely color and disease The *Aristotelian Mirabilia* and *Early Peripatetic Natural Science* should prove invaluable to scholars and students interested in the ancient Greek study of nature ancient philosophy and Aristotelian science in particular

Poison, Medicine, and Disease in Late Medieval and Early Modern Europe Frederick W Gibbs, 2018-07-20 This book presents a uniquely broad and pioneering history of premodern toxicology by exploring how late medieval and early modern c 1200 1600 physicians discussed the relationship between poison medicine and disease Drawing from a wide range of medical and natural philosophical texts with an emphasis on treatises that focused on poison pharmacotherapeutics plague and the nature of disease this study brings to light premodern

physicians debates about the potential existence nature and properties of a category of substance theoretically harmful to the human body in even the smallest amount Focusing on the category of poison *venenum* rather than on specific drugs reframes and remixes the standard histories of toxicology pharmacology and etiology as well as shows how these aspects of medicine although not yet formalized as independent disciplines interacted with and shaped one another Physicians argued for instance about what properties might distinguish poison from other substances how poison injured the human body the nature of poisonous bodies and the role of poison in spreading and to some extent defining disease The way physicians debated these questions shows that poison was far from an obvious and uncontested category of substance and their effort to understand it sheds new light on the relationship between natural philosophy and medicine in the late medieval and early modern periods
