Bilateral Intrarenal Calculi:

CT Urography Stuart G. Silverman, Richard H. Cohan, 2007 Featuring over 500 images this atlas is the first text on performing and interpreting CT urography Chapters detail the indications and techniques for CT urography review the risks of radiation exposure show how normal urinary tract anatomy and variants appear on CT scans and demonstrate a wide range of urinary tract abnormalities as they appear on thin section CT The final chapter illustrates artifacts and diagnostic pitfalls Chapters on abnormalities follow a case based teaching file format Each case is presented on a two page spread with images and succinct discussion of the entity and how CT urography was used to diagnose it *Ureteroscopy* Bradley F. Schwartz, John D. Denstedt, 2019-09-28 This text provides a comprehensive and contemporary discussion of current indications techniques technology and results in ureteroscopy from the world leaders who perform this procedure It provides not only the latest literature and data regarding URS but also tips and tricks for the reader when performing various URS procedures Historical prospective will link the reader with the past and provide insight as to why we have evolved into a minimally invasive specialty Technological advancements of both flexible and rigid ureteroscopic procedures are included to provide the reader with many practical considerations when choosing this modality for their patients Renowned experts in the field discuss the myriad of supplemental devices that accompany URS and how best to utilize them in one's practice Unique to this predominantly clinical text are sections on simulation and the socioeconomics of URS that demonstrate how the student can learn and acquire techniques and skills of their own *Ureteroscopy A Comprehensive Contemporary Guide* provides its readers with a thorough and complete representation of the current state of URS and its applications and guide those interested in improving their techniques armamentarium and horizons in this ever changing world of minimally invasive urology **Kidney Disease and Nephrology Index**, 1977-07 **Renal Calculus** Leslie N. Pyrah, 2012-12-06 Stone in the urinary tract has fascinated the medical profession from the earliest times and has played an important part in the development of surgery The earliest major planned operations were for the removal of vesical calculus renal and ureteric calculi provided the first stimulus for the radiological investigation of the viscera and the biochemical investigation of the causes of calculus formation has been the training ground for surgeons interested in metabolic disorders It is therefore no surprise that stone has been the subject of a number of monographs by eminent urologists but the rapid development of knowledge has made it possible for each one of these authors to produce something new There is still a technical challenge to the surgeon in the removal of renal calculi and on this topic we are always glad to have the advice of a master craftsman but inevitably much of the interest centres on the elucidation of the causes of stone formation and its prevention Professor Pyrah has had a long and wide experience of the surgery of calculous disease and gives us in this volume something of the wisdom that he has gained thereby but he has also been a pioneer in the setting up of a research department largely concerned with the investigation of this complex group of disorders so that he is able to present in terms readily intelligible

to the general medical reader the results of extensive biochemical investigation in this area **Ureteroscopy** Manoj Monga,2012-11-28 Ureteroscopy Indications Instrumentation Technique provides a comprehensive and state of the art review of ureteroscopy and will serve as a valuable resource for urologists throughout the world The volume provides evidence based outcomes to support the expanding indications for ureteroscopy as well as a strong emphasis on appropriate patient selection The book also provides detailed recommendations for the step by step approach to ureteroscopy from both an instrumentation and techniques perspective The work is extensively illustrated with endoscopic images and accompanied by a web site of video clips which further highlight the clinical application of available endoscopic techniques The text also includes highly practical presentations of complex endourologic case presentations with expert analysis and editorial commentary Example cases would include common but challenging cases of ureteroscopy for transitional cell cancer horseshoe kidneys hutch diverticulum and pregnancy Ureteroscopy Indications Instrumentation Technique provides a unique and valuable resource in the field of ureteroscopy and will include basic instructions for those currently in training or those who have yet to adapt intrarenal ureteroscopy into their surgical armamentarium Advanced ureteroscopic approaches are also covered for those wishing to enrich their current clinical expertise Minimally Invasive Percutaneous
