Monica Cheesbrough, 2005-09-08. This new edition includes an update on HIV disease. AIDS recently developed HIV rapid tests to diagnose HIV infection and screen donor blood and current information on antiretroviral drugs and the laboratory monitoring of antiretroviral therapy. Information on the epidemiology and laboratory investigation of other pathogens has also been brought up to date. Several new rapid simple to perform immunochromatographic tests to assist in the diagnosis of infectious diseases are described, including those for brucellosis, cholera, dengue, leptospirosis, syphilis and hepatitis. There are ample clear illustrations, tables and photographs to render the various information easy to digest.
