Blue Future Maude Barlow, 2011-05-10 Water is a human right A rousing case for what will be one of the key environmental challenges of the twenty first century Booklist The United Nations has recognized access to water as a basic human right but there is still much work to be done to stem this growing environmental crisis In this book water activist Maude Barlow draws on her extensive experience to lay out a set of key principles that show the way forward to what she calls a water secure and water just world Not only does she reveal the powerful players even now impeding the recognition of the human right to water she argues that water must not become a commodity to be bought and sold on the open market Focusing on solutions she includes stories of struggle and resistance from marginalized communities as well as government policies that work for both people and the planet At a time when climate change has moved to the top of the national agenda and the stage is being set for unprecedented drought mass starvation and the migration of millions of refugees in search of water *Blue Future* is an urgent call to preserve our most valuable resource for generations to come In a book as clear as a pristine mountain stream Maude Barlow lays out a practical and inspiring vision for how we can defend water the source of all life from the forces of death Naomi Klein author of *The Shock Doctrine* *Canadian Environmental Philosophy* C. Stemming the Tide Madeline

Baer,2017-08-01 When privatization of public services swept the developing world in the 1990s it was part of a seemingly unstoppable tide of neoliberal reforms aimed at reducing the role of the state and reorienting economies toward market led policymaking Consequently water privatization sparked a fierce debate over whether public services should be owned and managed by private corporations and gave rise to a water justice movement that redefined water services as basic human rights Stemming the Tide explores how the human right to water and sanitation is fulfilled in different contexts whether neoliberal policies like privatization pose a threat to the right to water and whether rights fulfillment leads to meaningful social change
