Archaeology And Capitalism From Ethics To Politics One World Archaeology:

Archaeology and Capitalism Yannis Hamilakis, Philip Duke, 2016-06-03 The contributors to this volume focus on the inherent political nature of archaeology and its relationship to power and explore how archaeologists can become more overtly agents of social change for individuals and communities

ARCHAEOLOGY AND CAPITALISM

Yannis Hamilakis, Philip Duke, 2007-12-15 The editors and contributors to this volume focus on the inherent political nature of archaeology and its impact on the practice of the discipline Pointing to the discipline's history of advancing imperialist colonialist and racist objectives they insist that archaeology must rethink its muted professional stance and become more overtly active agents of change The discipline is not about an abstract archaeological record but about living individuals and communities whose lives and heritage suffer from the abuse of power relationships with states and their agents Only by recognizing this power disparity and adopting a political ethic for the discipline can archaeology justify its activities Chapters range from a critique of traditional ethical codes to examinations of the capitalist motivations and structures within the discipline to calls for an engaged emancipatory archaeology that improves the lives of the people with whom archaeologists work A direct challenge to the discipline this volume will provoke discussion disagreement and inspiration for many in the field

Archaeological Practice as Politics and Ethics John Carman, 2024-08-29 This book is of relevance to all archaeologists and all others concerned with how an interest in the past impacts on the present This book explores the manner in which archaeology as a discipline and a field of endeavour contributes to the modern world The focus throughout the book is on practices the range of different things that archaeologists do and how they do and have done it in order to explore the field as a distinctive aspect of social practice over time It also concerns the structures social political economic professional philosophical in which archaeology is performed and the consequences for the discipline and its practitioners Throughout there is a concern especially with archaeology as a field of political and ethical decision making aspects well recognised by practitioners but rarely emphasised The book both asks and answers questions about the perception of archaeology from both within and outside the field The book draws widely on previous work by the author and others looking at the techniques of the field the people involved the political and social impacts both on and by the field In doing so it seeks to bring these different perspectives together to create a more holistic idea of what archaeology is has been and could be The book is offered to those outside the field as a justification for archaeology a field coming under increasing pressure from those who consider it as so many humanities and social science disciplines as an expensive luxury

Archaeological Resource Management John Carman, 2015-09-09 Archaeological Resource Management provides an international comparison of the main practices involved in managing archaeological remains especially their identification and recording their evaluation for significance their preservation and their presentation to the public

Archaeology in the PPG16 Era

Timothy Darvill, Kerry Barrass, Vanessa Constant, Ehren Milner, Bronwen Russell, 2019-02-28 The Archaeological

Investigations Project AIP funded by English Heritage systematically collected information about the nature and outcomes of more than 86 000 archaeological projects undertaken between 1990 and 2010 This volume looks at the long term trends in archaeological investigation and reporting places this work within wider social political and professional contexts and reviews its achievements Information was collected through visits to public and private organizations undertaking archaeological work Planning Policy Guidance Note 16 Archaeology and Planning known as PPG16 published in 1990 saw the formal integration of archaeological considerations with the UK town and country planning system that and set out processes for informed decision making and the implementation of post determination mitigation strategies defined a formative era in archaeological practice and established principles that underpin today s planning policy framework The scale of activity represented more 1000 excavations per year for most of the PPG16 Era is more than double the level of work undertaken at peak periods during the previous three decades This comprehensive review of the project presents a wealth of data A series of case studies examines the illustrate different types of development project revealing many ways in which projects develop how archaeology is integrated with planning and execution and the range of outputs documenting the process and identified a series of ten important lessons that can be learned from these investigations Looking into the post PPG16 Era the volume considers anticipated developments in the changing worlds of planning property development and archaeological practice and proposes the monitoring of archaeological investigations in England using a two pronged approach that involves self reporting and periodic strategic overviews

Comparative Archaeologies Ludomir R Lozny, 2011-04-06 Archaeology as with all of the social sciences has always been characterized by competing theoretical propositions based on diverse bodies of locally acquired data In order to fulfill local regional expectations different goals have been assigned to the practitioners of Archaeology in different regions These goals might be entrenched in local politics or social expectations behind cultural heritage research This comprehensive book explores regional archaeologies from a sociological perspective to identify and explain regional differences in archaeological practice as well as their existing similarities This work covers not only the currently dominant Anglo American archaeological paradigm but also Latin America Western and Eastern Europe Asia and Africa all of which have developed their own unique archaeological traditions The contributions in this work cover these alternative archaeologies in the context of their own geographical political and socio economic settings as well as the context of the currently accepted mainstream approaches

Controlling the Past, Owning the Future Ran Boytner, Lynn Swartz Dodd, Bradley J. Parker, 2010-12-15 What are the political uses and misuses of archaeology in the Middle East In answering this question the contributors to this volume lend their regional expertise to a variety of case studies including the Taliban s destruction of Buddhas in Afghanistan the commercialization of archaeology in Israel the training of Egyptian archaeology inspectors and the debate over Turkish identity sparked by the film Troy among other provocative subjects Other chapters question the ethical justifications of archaeology in places that have alternative engagements with the material past In the

process they form various views of the role of the archaeologist from steward of the historical record to agent of social change. The diverse contributions to this volume share a common framework in which the political use of the past is viewed as a process of social discourse. According to this model, political appropriations are seen as acts of social communication designed to accrue benefits to particular groups. Thus the contributors pay special attention to competing social visions and the filters these impose on archaeological data. But they are also attentive to the potential consequences of their own work. Indeed, as the editors remind us, people's lives may be affected sometimes dramatically because of the material remains that surround them. Rounding out this important volume are critiques by two top scholars who summarize and synthesize the preceding chapters.

Archaeological Heritage Conservation and Management Brian J. Egloff, 2019-01-31. Archaeological heritage conservation is all too often highly conflicted. Economic interests are often at the forefront of management decision making with heritage values given lesser if any consideration but when heritage places are managed with international principles in mind, the sites stand out as evidencing superior outcomes.

Archaeologies of Conflict John Carman, 2013-04-11. The last two decades have seen the emergence of a specific set of archaeological approaches to war and conflict. This concise and readable study assesses the current state of conflict archaeology looking forward to what the field can offer as it develops.

Reconsidering Archaeological Fieldwork Hannah Cobb, Oliver J. T. Harris, Cara Jones, Philip Richardson, 2012-03-07. Digging, recording, and writing are the three main processes that archaeologists undertake to analyze a site yet the relationships between these processes is rarely considered critically. *Reconsidering Archaeological Fieldwork* asserts that each of these processes involves at least a bit of subjective interpretation. As a group of archaeologists work together to reconstruct an objective view of the past at a particular time at a particular site, their field methods and subjective interpretations affect the final analysis. This volume explores the important nature of the relationship between fieldwork analysis and interpretation. Containing contributions from a diverse group of archaeologists both academic and professional from Europe and the Americas, it critically analyzes accepted practices in field archaeology and provides thoughtful and innovative analysis of these procedures. By combining the experiences of both academic and professional archaeologists, *Reconsidering Archaeological Fieldwork* highlights key differences and key similarities in their concerns, theories, and techniques. This volume will incite discussion on fundamental questions for all archaeologists both old and new to the field.
