Architecture Re Assembled The Use And Abuse Of History:

Architecture Re-assembled Trevor Garnham, 2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place between past and future that promotes thinking for making

A Landscape of Architecture, History and Fiction Jonathan Hill, 2015-12-22 Architecture can be analogous to a history a fiction and a landscape We expect a history or a novel to be written in words but they can also be cast in concrete or seeded in soil The catalyst to this tradition was the simultaneous and interdependent emergence in the eighteenth century of new art forms the picturesque landscape the analytical history and the English novel Each of them instigated a creative and questioning response to empiricism s detailed investigation of subjective experience and the natural world and together they stimulated a design practice and lyrical environmentalism that profoundly influenced subsequent centuries Associating the changing natural world with journeys in self understanding and the design process with a visual and spatial autobiography this book describes journeys between London and the North Sea in successive centuries analysing an enduring and evolving tradition from the picturesque and romanticism to modernism Creative architects have often looked to the past to understand the present and imagine the future Twenty first century architects need to appreciate the shock of the old as well as the shock of the new

The Architecture of Ruins Jonathan Hill, 2019-03-25 *The Architecture of Ruins* Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier

ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Infrastructure and the Architectures of Modernity in Ireland 1916-2016 Gary A. Boyd, John McLaughlin, 2016-12-05 At the formation of the new Republic of Ireland the construction of new infrastructures was seen as an essential element in the building of the new nation just as the adoption of international style modernism in architecture was perceived as a way to escape the colonial past Accordingly infrastructure became the physical manifestation the concrete identity of these objectives and architecture formed an integral part of this narrative Moving between scales and from artefact to context Infrastructure and the Architectures of Modernity in Ireland 1916 2016 provides critical insights and narratives on what is a complex and hitherto overlooked landscape one which is often as much international as it is Irish In doing so it explores the interaction between the universalising and globalising tendencies of modernisation on one hand and the textures of local architectures on the other The book shows how the nature of technology and infrastructure is inherently cosmopolitan Beginning with the building of the heroic Shannon hydro electric facility at Ardnacrusha by the German firm of Siemens Schuckert in the first decade of independence Ireland became a point of varying types of intersection between imported international expertise and local need Meanwhile at the other end of the century by the year 2000 Ireland had become one of the most globalized countries in the world site of the European headquarters of multinationals such as Google and Microsoft Climatically and economically expedient to the storing and harvesting of data Ireland has subsequently become a repository of digital information farmed in large single storey sheds absorbed into anonymous suburbs In 2013 it became the preferred site for Intel to design and develop its new microprocessor chip the Galileo The story of the decades in between of shifts made manifest in architecture and infrastructure from the policies of economic protectionism to the opening up of the country to direct foreign investment and the embracing of the EU is one of the influx of technologies and cultural references into a small country on the edges of Europe as Ireland became both a launch pad and testing ground for a series of aspects of designed modernity

Colin Rowe's Gospel of Modern Architecture Braden R. Engel, 2022-05-11 Colin

Rowe is recognized as one of the most influential architecture teachers of the twentieth century yet he is more popularly known for his critical essays This book investigates the methods that made Rowe such an influential teacher Paralleling the promises of the modernists to biblical prophecies of salvation Rowe led his students into the temptations of modern architecture in order to test their convictions in architectural design Everything Rowe did taught and beyond his published writing this book uniquely pulls from his personal notes sketches talks and thoughts This analysis of Rowe s use of irony paradox ambiguity and subversion will benefit educators and designers interested in the roles of mischief and curiosity in creative endeavors The book offers a more balanced appreciation of Colin Rowe while rethinking attitudes to pedagogy historical interpretation and meaning in the arts

Charles Bridgeman (c.1685-1738) Susan Haynes,2023 An examination of the garden plans of eighteenth century landscape architect Charles Bridgeman shedding light on his artistic vision and contributions to English garden history Charles Bridgeman was a popular and highly successful landscape architect in the first part of the eighteenth century He was Royal Gardener to George I and George II designing the gardens at Kensington Palace for them and working for many of the ruling Whig elite including Sir Robert Walpole at Houghton Hall in Norfolk His landscapes were audacious and monumental but he is barely known outside the world of academic garden history most of his gardens have disappeared changed out of all recognition to chime with later tastes shaped by Lancelot Brown s vision of a more natural landscape or buried under housing developments and golf courses and there is little archaeological or written evidence of his work This book aims to redress this injustice and rescue his legacy It draws on the only significant body of evidence which survived him an extensive but wildly heterogenous corpus of garden plans Close examination of them reveals an artistic vision heavily influenced by the late seventeenth century geometric garden but deeply rooted in the genius of the place and working methods that include a proto business model which prefigures the gentleman improvers who followed him The volume brings him from obscurity to demonstrate his skill as an artist a manipulator of space on a grand scale and a consummate practitioner a deserved member of the canon of famous and revered English landscape gardeners

The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum Cristina González-Longo,2020-12-29 This book examines the influence of architectural design in the conservation of historic buildings by discussing in detail an important building complex in Rome the Temple of Venus and Rome the monastery of Santa Maria Nova and the church of Santa Francesca Romana As the most complete site in the Roman Forum that has reached our times with a rich architectural stratification almost intact it is a clear product of continuous preservation and transformation and it has not been studied in its complexity until now The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum unravels the original designs and the subsequent interventions including Giacomo Boni s pioneering conservation of the monastery carried out while excavating the Roman Forum in the early twentieth century The projects are discussed in context to show their significance and the relationships between architects and patrons Through its interdisciplinary focus on
