What is a programmable room thermostat? An explanation for householders

A programmable room thermostat is built as a programmer and a room thermostat. A programmer allows you to set 'on' and 'off' times, which can be used to control the heating system. A room thermostat allows you to set the temperature you want the room to be. The thermostat will then turn the heating on or off to keep the room at the temperature you have set.

For a programmable room thermostat, you can set the temperature you want the room to be, and you can set the 'on' and 'off' times. The thermostat will then turn the heating on or off to keep the room at the temperature you have set.

Setting a programmable room thermostat to a higher setting will not make the room any warmer than the room is. The thermostat will only turn the heating on or off to keep the room at the temperature you have set.

Setting a programmable room thermostat to a lower setting will not make the room any cooler than the room is. The thermostat will only turn the heating on or off to keep the room at the temperature you have set.

The room in which you have set the thermostat will be the room in which the thermostat will control the heating. The thermostat will not control the heating in any other room.
