Paul,2015-07-11 More than 300 Bible or New Testament translations including the popular King James Version have been produced in English in the past 600 years These various translations both obscure and well known were undertaken by diligent individuals working either alone or in committees known to number more than 100 This reference work provides information about the men and women who produced English language translations Arranged alphabetically by surname each of the 346 entries includes biographical and vocational information notes on the various editions produced samples of their translation and other pertinent facts In cases where translations were done by committee the chairpersons and project initiators are covered Important anonymous translations are also included *Paul's Concept of Justification* Richard Kingsley Moore,2015-02-11 The Greek family of words characterizing the doctrine of justification by faith as it is known in English is most prominent in the writings of the Apostle Paul It was this doctrine that lay at the heart of the sixteenth century Reformation Martin Luther and his followers considered it to be at the very center of the gospel Protestants came to understand justification differently from the Catholic Church they had left Instead of the Catholic realist view in which God makes a sinner righteous they came to a forensic understanding by which God as judge declares a sinner righteous During the nineteenth century a third relational view began to emerge it viewed justification as God s gift of a right relationship to a sinner This monograph examines Paul s concept from three perspectives the New Testament data the way the doctrine has developed historically and how the doctrine has been expressed in English translations of the Scriptures The author concludes that it is the relational view that most accurately depicts Paul s concept of justification *Differences Between Bible Versions: Third Edition* Gary F. Zeolla,2012-04-18 This book answers such questions as Why do Bible versions differ Why does the same verse read differently in different versions Why do some versions contain words phrases and even entire verses that other versions omit Which Bible versions are most reliable This book contains extensive discussions on why the author believes either a literal or a formal equivalence word for word translation principle is the best method to use for

translating the Bible These principles of translating are contrasted with the dynamic equivalence phrase for phrase and paraphrase methods seen in many modern Bible versions This book includes detailed discussions on why the author believes the Majority Text is the most accurate of the three Greek texts used in Bible translation This book also contains an extended section critiquing the claims of KJV onlyists In addressing these various issues Differences Between Bible Versions compares forty different versions of the Bible *Let the Words be Written* Philip C. Stine, 2004 **Toward a Science of**

Translating? Stefan Felber, 2025-03-27 Eugene A Nida is one of the pioneers and founders of modern translation theory coining the terms dynamic equivalence and formal equivalence and energetically promoting the former though in his latter years preferring the term functional equivalence Originally formulated for the Bible Translation efforts amongst people groups without the Bible Nida's theories of translation have also been widely influential in Translation Studies making this presentation of Eugene A Nida's life 1914 2011 and assessment of his works especially timely and significant Stefan Felber is a German Old Testament scholar former seminary professor and author of the German only *Wesen und Würde des Wortes Biblisch theologische Grundlagen für das Verständnis von Sprache und Kommunikation* The Nature and Dignity of the Word Biblical Theological Foundations for Understanding Language and Communication in *Zwischen Babel und Jerusalem Aspekte von Sprache und Übersetzung* among other works As such he is uniquely qualified to offer this fair minded and masterful yet critical evaluation of Nida's model of translation doing so from a rich variety of disciplines including exegesis theology philology and philosophies of language Whether one agrees or disagrees with either Nida or Felber I highly recommend this rigorous and wide ranging exposition for advancing informed dialogue and promoting further understanding and advances in Translation Studies Professor Tom McCormick Tyndale University College Toronto Although the theory of Dynamic or Functional Equivalence was the most widely used method in global Bible translation after the Second World War there has been no comprehensive study of its foundations and how it was developed by Eugene Nida Filling this gap is one of the great merits of Felber's study Felber while showing great respect for Nida critically evaluates Dynamic Equivalence from various perspectives exegetical theological philosophical and linguistic This multi dimensional nuanced approach provides the reader with thought provoking and helpful insights that further the discussion in important ways Felber's study is a must read for all who deal with language and translation in theology and the church in Bible translation and mission Prof Dr Markus Zehnder Internationale Hochschule Bad Liebenzell Evangelische theologische Fakultät Leuven Ansgarskolen Kristiansand Stefan Felber's *Toward a Science of Translating* is a landmark study in Biblical Translation Theory focussing on Eugene Nida 1914 2011 who for many years was a central figure in the American Bible Society and the United Bible Societies Nida has been described as probably the world's leading scholar on translation and his theory of Dynamic or Functional Equivalence provided a leading paradigm for Bible translators for decades In this thorough analysis of his work and its reception Felber highlights a number of weaknesses as well as some strengths affiliated with Nida's theory promoting translation theory based

on reader oriented thought for thought patterns rather than traditional source oriented analysis of textual form and content Felber s evaluation raises a critical question Are facets of the biblical text pertaining to biblical language and hermeneutics theology and the transcendent downplayed in Nida s addressee oriented approach to translation I hope this book will be widely read by translators biblical scholars and others interested in translation of the Bible Dr Tomas Bokedal Associate Professor of New Testament and Early Christianity NLA University College Norway Docent of New Testament Exegesis Lund University Sweden **The Feminine Spirit** Lynne Bundesen, 2007-03-30 Using a variety of analytical and descriptive tools this nondenominational innovative and solid approach to the Bible goes deeply into biblical text to uncover new insights about who God is It provides a fresh and insightful way for women to read the Bible outside the patriarchal framework that has predominated going beyond stereotypes and male centered traditional teachings to illuminate how women can better relate both to the Bible and to God
