Binary Cycle Saga 3 Book Series:

The Delian Cycle Alan Burt Akers, 2007-04 These five books make up the Delian Cycle in which Dray Prescott of Earth comes to terms with finding himself on the alien world of Kregen *Jesuit Education and The Classics* Shannon Byrne, Edmund P. Cueva, 2009-10-02 Is Classics still important and relevant to a Jesuit education The answer is a resounding Yes Classics remains an essential component of Jesuit education This series of essays argues and proves that Classics and Jesuit education are indivisibly intertwined Moreover any Jesuit school that embraces liberal arts must have Classics at the core of its curriculum **Environmental Literacy and New Digital Audiences** Pat Brereton, 2018-12-07 Environmental literacy and education is not simply a top down process of disseminating correct attitudes values and beliefs Rather it is one that incorporates and facilitates a dialogue with audiences of different persuasions and at all levels of engagement to help highlight and co produce consensual solutions to the major eco challenges of our time Exploring the growing power and influence of media formats and outlets like YouTube and gaming alongside fictional and documentary film this book considers new modes of environmental literacy to ascertain the effectiveness of digital and filmic stimuli on an audience s perception of environmental issues and its specific impact on environmental action Drawing on extensive research across a broad range of media formats Brereton establishes how environmental narratives and meanings are created and being received by contemporary audiences This book will be of great interest to students and scholars of environmental communication and media eco criticism and environmental humanities more broadly *Literature 1987, Part 1* S. Bandelj,2026-01-20 What happens when children become investment projects and child rearing becomes exhausting labor Parents are exhausted When did raising children become such all consuming never ending incredibly expensive and emotionally absorbing effort In this eye opening book Nina Bandelj explains how we got to this point how we turned children into financial and emotional investments and child rearing into laborious work At the turn of the twentieth century children went from being economically useful often working to support families to being seen by their parents as vulnerable and emotionally priceless In the new millennium however parents have become overinvested in the emotional economy of parenting Analyzing in depth interviews with parents national financial datasets and decades of child rearing books Bandelj reveals how parents today spend save and even go into debt for the sake of children They take on parenting as the hardest but most important job and commit their entire selves to being a good parent The economization and emotionalization of society work together to drive parental overinvestment offering a dizzying array of products and platforms to turn children into human capital from financial instruments to extracurricular programs to therapeutic parenting advice And yet Bandelj warns the privatization of child rearing and devotion of parents monies emotions and souls ultimately hurt the well being of children parents and society Overinvested offers a compelling argument that we should reimagine children and what it means to raise them
