so radically in these and other important aspects of our sexuality from our closest ancestor the apes Why does the human female virtually alone among mammals go through menopause Why does the human male stand out as one of the few mammals to stay with the female he impregnates to help raise the children that he sired Why is the human penis so unnecessarily large There is no one better qualified than Jared Diamond to explain the evolutionary forces that operated on our ancestors to make us so different sexually With wit and a wealth of fascinating examples Why Is Sex Fun shows how our sexuality as much as our large brains or upright posture led to human rise in the animal kingdom
