Asian Yearbook of International Law, Volume 22 (2016)

Seokwoo Lee, Hee Eun Lee, 2019-09-02

Launched in 1991 the Asian Yearbook of International Law is a major internationally refereed yearbook dedicated to international legal issues as seen primarily from an Asian perspective. It is published under the auspices of the Foundation for the Development of International Law in Asia (DILA) in collaboration with DILA Korea, the Secretariat of DILA in South Korea. When it was launched the Yearbook was the first publication of its kind, edited by a team of leading international law scholars from across Asia. It provides a forum for the publication of articles in the field of international law and other Asian international legal topics. The objectives of the Yearbook are two-fold: First to promote research study and writing in the field of international law in Asia and second to provide an intellectual platform for the discussion and dissemination of Asian views and practices on contemporary international legal issues. Each volume of the Yearbook contains articles and shorter notes, a section on Asian state practice, an overview of the Asian states' participation in multilateral treaties and succinct analysis of recent international legal developments in Asia, a bibliography that provides information on books, articles, notes and other materials dealing with international law in Asia as well as book reviews. This publication is important for anyone working on international law and in Asian studies.

Ocean Hydrodynamics of the Japan and East China Seas T. Ichiye, 2000-04-01

The Japan and East China seas are both marginal seas but have different oceanographical features: the former is a deep basin filled with polar water but a jet-like current in the upper layer and the latter is a wide continental shelf with two large rivers. This book provides the first synthesis of information on the circulation, hydrography, coastal phenomena, tides, turbidity and wind waves of these seas. Circulation caused by wind pressure distributions and other effects is discussed with the aid of analytical, numerical and hydraulic models, many of which can also be applied to problems in other seas. New oceanographic techniques covered include remote sensing, drifter tracking and moored current meter system, providing information useful to both researchers and students.

Border Disputes

Emmanuel Brunet-Jailly, 2015-07-28

An ideal resource for anyone studying current events, social studies, geopolitics, conflict resolution and political science, this three-volume set provides broad coverage of approximately 80 current international border disputes and conflicts. Border disputes are a common source of political instability and military conflict around the globe, both in the present day and throughout history. *Border Disputes: A Global Encyclopedia* will serve as an invaluable resource for students studying social studies, political science, human geography or related subjects. Each volume of this expansive encyclopedia begins with an accessible introduction to the type of dispute to be discussed, identifying the conflict as territorial. Volume 1: positional; Volume 2: or functional; Volume 3: Following the background essay in each volume are comprehensive case study entries on specific international conflicts, examining the disputed area, the reasons for the dispute and cultural, political, historical and legal issues relating to the dispute. The third volume will also provide primary documents.
