Academic Capitalism And The New Economy Markets State And Higher Education:

Academic Capitalism and the New Economy Sheila Slaughter, Gary Rhoades, 2004-09-24 Defining the terms of academic capitalism in the new economy this study offers insights into the trajectory of American higher education Jacket

Academic Capitalism Sheila Slaughter, Larry L. Leslie, 1997 To grasp the extent of changes taking place and to understand the forces of change this book examines the current state of academic careers and institutions with a particular focus on public research universities in the United States Canada the United Kingdom and Australia *Academic Capitalism in the Age of Globalization* Brendan Cantwell, Ilkka Kauppinen, 2014-11-15 Understanding higher education and the knowledge economy in the Age of Globalization Today nearly every aspect of higher education including student recruitment classroom instruction faculty research administrative governance and the control of intellectual property is embedded in a political economy with links to the market and the state Academic capitalism offers a powerful framework for understanding this relationship Essentially it allows us to understand higher education's shift from creating scholarship and learning as a public good to generating knowledge as a commodity to be monetized in market activities In *Academic Capitalism in the Age of Globalization* Brendan Cantwell and Ilkka Kauppinen assemble an international team of leading scholars to explore the profound ways in which globalization and the knowledge economy have transformed higher education around the world The book offers an in depth assessment of the theoretical foundations of academic capitalism as well as new empirical insights into how the process of academic capitalism has played out Chapters address academic capitalism from historical transnational national and local perspectives Each contributor offers fascinating insights into both new conceptual interpretations of and practical institutional and national responses to academic capitalism Incorporating years of research by influential theorists and building on the work of Sheila Slaughter Larry Leslie and Gary Rhoades *Academic Capitalism in the Age of Globalization* provides a provocative update for understanding academic capitalism The book will appeal to anyone trying to make sense of contemporary higher education *Academic Capitalism and the New Economy* S. Slaughter, 2004 *American Higher Education in the Twenty-First Century* Michael N. Bastedo, Philip G. Altbach, Patricia J. Gumport, 2023-01-31 Now in its fifth edition An indispensable reference for anyone concerned with the future of American colleges and universities Whether it is advances in information technology organized social movements or racial inequality and social class stratification higher education serves as a lens for examining significant issues within American society First published in 1998 *American Higher Education in the Twenty First Century* offers a comprehensive introduction to the complex realities of American higher education including its history financing governance and relationship with the states and federal government This thoroughly revised edition brings the classic volume completely up to date Each chapter has been rewritten to address major recent issues in higher education including the COVID 19 pandemic the movement for racial justice and turmoil in the for profit sector Three entirely new chapters cover broad access colleges race and racism and

organized social movements Reflecting on the implications of ethnic and socioeconomic diversity within higher education the book also grapples with growing concerns about the responsiveness and future of the academy No other book covers such wide ranging issues under the broader theme of higher education s relationship to society Highly acclaimed and incorporating cutting edge research American Higher Education in the Twenty First Century is now more useful and engaging than ever Contributors Michael N Bastedo Philip G Altbach Patricia J Gumpert Peter Riley Bahr Joy Blanchard Julia Brickfield Michael Brown Katherine S Cho Daniela Conde Charles H F Davis III Hans de Wit Peter D Eckel Martin Finkelstein Denisa G ndara Liliana M Garces Roger L Geiger Leslie D Gonzales Jillian Leigh Gross Jessica Harris Nicholas Hillman Julia Rose Karpicz Robert Kelchen Adrianna Kezar Lisa R Lattuca Demetri Morgan Rebecca Natow Anna Neumann Audrey Peek Laura W Perna Gary Rhoades Tykeia N Robinson Roman Ruiz Wonson Ryu Lauren T Schudde Jeffrey C Sun David A Tandberg

New Languages and Landscapes of Higher Education Peter Scott, Jim Gallacher, Gareth Parry, 2017 The landscapes of higher education have been changing rapidly with enormous growths in participation rates in many countries across the world and major developments and changes within institutions But the languages that we need to conceptualise and understand these changes have not been keeping pace The central argument in this book is that new ways of thinking about higher education the new languages of its title are needed to understand the role of universities and colleges in contemporary society and culture and the global economy new landscapes Over reliance on existing conceptualisations of higher education has made it difficult to understand fully the nature of 21st century higher education It may also have encouraged a view that there is no alternative to the development of more marketized forms of higher education The analysis offered suggests that the future is much more open It argues that familiar categories normally accepted as givens are actually more fluid Systems of higher education whether expressed through direct public funding or through regulatory regimes are being eroded Institutions often assumed to be to be given enhanced agency by more corporate forms of management and governance are no longer powerful actors if they ever were Research often corralled by assessment and management systems is becoming more diffuse and distributed Learning supposedly more focused on skill outcomes and employability retains a more broadly educative function The publicness of higher education has not disappeared as public funding has diminished but taken on new forms With contributions from leading figures drawn from a wide range of countries this book provides an authoritative analysis of many of the major issues which dominate discussion with respect to policy practice and research in the field of higher education and it can expect to become a major source book for all who are interested in the development of higher education in the 21st Century

Transformations in Research, Higher Education and the Academic Market Sharon Rider, Ylva Hasselberg, Alexandra Waluszewski, 2012-12-30 This volume tackles head on the controversy regarding the tensions between the principles underlying Academe on the one hand and the free market on the other Its outspoken thesis posits that seemingly irresistible institutional pressures are betraying a core

principle of the Enlightenment that the free pursuit of knowledge is of the highest value in its own right As market principles are forced on universities inducing a neoteric culture of managerialism many worry that the very characteristics that made European higher education in particular such a success are being eroded and replaced by ideological opportunism and economic expediency Richly interdisciplinary the anthology explores a wealth of issues such as the phenomenon of bibliometrics linking an institution's success to the volume and visibility of publications produced Many argue that the use of such indicators to measure scientific value is inimical to the time consuming complexities of genuine truth seeking A number of the greatest discoveries and innovations in the history of science such as Newton's laws of mechanics or the Mendelian laws of inheritance might never have seen the light of day if today's system of determining and defining the form and content of science had dominated With analytical perspectives from political science economics philosophy and media studies the collection interrogates for example the doctrine of graduate employability that exerts such a powerful influence on course type and structure especially on technical and professional training In contrast the liberal arts must choose between adaptation to the dictates of employability strategies or wither away as enrollments dwindle and resources evaporate Research projects and aims have also become an area of controversy with many governments now assessing the value of proposals in terms of assumed commercial benefits The contributors argue that these changes as well as reforms in the managerial and administrative structures in tertiary education constitute a radical break with the previous ontology of science and scholarship a change in its very character and not merely its form It shows that the scientific thinking students researchers and scholars are encouraged to adopt is undergoing a rapid shift in conceptual content with significant consequences not only for science but also for the society of which it is a part

Higher Education, Stratification, and Workforce Development Sheila Slaughter,Barrett Jay Taylor,2015-11-17 This work analyses how political economic shifts contribute to competition within higher education systems in the US EU and Canada The authors highlight competition for prestige and public and private subsidies exploring the consequences of these processes through theoretical and empirical analyses Accordingly the work highlights topics that will be of interest to a wide range of audiences Concepts addressed include stratification privatization of formerly public subsidies preference for high tech academic fields and the vocationalization of the curriculum i.e Science Technology Engineering and Mathematics STEM fields selected professions and business rather than the liberal arts or the Humboldtian vision of the university Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development casting universities as corporate research laboratories and education as central to job creation Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases

*Economic Representations , **The Instrumental***

University Ethan Schrum, 2019-06-15 In *The Instrumental University* Ethan Schrum provides an illuminating genealogy of the educational environment in which administrators professors and students live and work today After World War II research universities in the United States underwent a profound mission change The *Instrumental University* combines intellectual institutional and political history to reinterpret postwar American life through the changes in higher education Acknowledging but rejecting the prevailing conception of the Cold War university largely dedicated to supporting national security Schrum provides a more complete and contextualized account of the American research university between 1945 and 1970 Uncovering a pervasive instrumental understanding of higher education during that era The *Instrumental University* shows that universities framed their mission around solving social problems and promoting economic development as central institutions in what would soon be called the knowledge economy In so doing these institutions took on more capitalistic and managerial tendencies and as a result marginalized founding ideals such as pursuit of knowledge in academic disciplines and freedom of individual investigators The technocratic turn eroded some practices that made the American university special Yet as Schrum suggests the instrumental university was not yet the neoliberal university of the 1970s and onwards in which market considerations trumped all others University of California president Clark Kerr and other innovators in higher education were driven by a progressive impulse that drew on an earlier tradition grounded in a concern for the common good and social welfare
